RESOLUTION

Planning and Development Act 2005 RESOLUTION TO PREPARE AMENDMENT TO LOCAL PLANNING SCHEME SHIRE OF BOYUP BROOK LOCAL PLANNING SCHEME NO.2 Amendment No 22

Resolved that the local government pursuant to section 72 of the *Planning and Development Act 2005*, amend the above Local Planning Scheme by:

- 1. Rezoning Lot 1 Forrest Street, Boyup Brook from the 'Residential' zone classification to the 'Town Centre' zone classification and amending the Scheme maps accordingly, which includes deleting the density coding R15/30.
- 2. Rezoning Lot 35 Barron Street, Boyup Brook from the 'Residential' zone classification to the 'Town Centre' zone classification and amending the Scheme maps accordingly, which includes deleting the density coding R15.
- 3. Amending the scheme maps by replacing the 'Commercial' zone classification with the 'Town Centre' zone classification.
- 4. Deleting the clause 30(2) as follows:

Where a lot has dual density coding R15/30, the local government may approve residential development at a higher code where development is connected to a Septic Tank Effluent Disposal (STED) community scheme; and

- 5. Re-numbering subsequent sub-clauses accordingly.
- 6. Amend text in the "Table of Contents" by:
 - a. At Part 3, 28, replacing 'commercial' with 'Town centre'.
- 7. Amend text at Table 2 by:
 - a. Replacing the 'Commercial' zone classification with the 'Town Centre' zone classification.
- 8. Amend text at Table 3 by:
 - a. Replacing 'Commercial' (column 2) with 'Town Centre'.
- 9. Amending text at clause 28 and Table 6 by:
 - a. Replacing the words 'COMMERCIAL' and 'Commercial', with the words 'TOWN CENTRE' and 'Town Centre' respectively.
- 10. Amending text at schedule 4, under column 1 (land use and/or development requiring advertisement), row 3 (Property Transactions) by:
 - a. Replacing the word 'Commercial' at b), with the words 'Town Centre'.

The Amendment is a 'Standard' amendment under the provisions of the *Planning and Development* (Local Planning Schemes) Regulations 2015 for the following reasons:

- a) The amendment would have minimal impact on land in the scheme area that is not the subject of the amendment; and
- b) The amendment does not result in any significant environmental, social, economic or governance impacts on land in the scheme area.

Dated this ?? day of ?? 2022

Dale Putland Chief Executive Officer

SCHEME AMENDMENT REPORT

1. <u>INTRODUCTION</u>

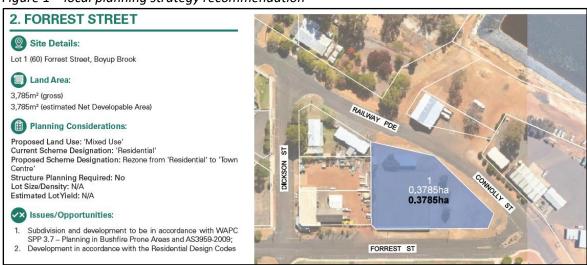

The Shire of Boyup Brook seeks the support of the Western Australian Planning Commission (WAPC) and the approval of the Hon. Minister for Planning to amend the Shire of Boyup Brook *Local Planning Scheme No. 2*, as follows:

- a) This amendment seeks to alter various parts of the *Local Planning Scheme No. 2* text and mapping to transfer the 'Commercial' zone classification to the 'Town Centre' zone classification.
- b) This amendment document also seeks to rezone Lot 1 Forrest Street and Lot 35 Barron Street, from the 'Residential' zone classification, to the 'Town Centre' zone classification.

2. BACKGROUND

The Shire of Boyup Brook Council has resolved to request the approval of the Commission, to advertise a draft Local Planning Strategy, which recommends that the Lot 1 Forrest Street is rezoned from 'Residential' to 'Town Centre'. The below is an extract from the draft Local Planning Strategy.

Figure 1 – local planning strategy recommendation

Originally, the Lot 1 Forrest Street was reserved for the purpose of 'Parks and Recreation' and used as a bowling green. To allow for the development of grouped housing for the purpose of aged persons, the land was rezoned to 'Residential'. The development of housing has not progressed, partly due to constraints associated with developing an on-site effluent disposal system, capable of servicing grouped housing. Instead, demand has occurred for commercial development, inparticular, expansion of a neighbouring farm supplies shop.

The Boyup Brook Farm Co-operative (farm supply shop), which is located at Lot 301 Forrest St has requested support from the Shire to rezone the Lot 35 Barron St, to allow for commercial expansion.

The rezoning from 'Residential' to 'Town Centre' would allow for a range of commercial activities and/or housing.

The Shire's *Local Planning Scheme No.2* does not have a 'Town Centre' zone classification. The draft strategy is suggesting that the scheme's 'Commercial' zone classification is transferred to the 'Town Centre' zone classification.

3. MODEL SCHEME

The Planning and Development (Local Planning Schemes) Regulations 2015, Schedule 1, Part 3, recognizes 'Centre' and 'Commercial' as being model zone classifications.

The Shire's Local Planning Scheme No.2 does not have a 'Centre' zone classification, however it does have a 'Commercial' zone classification.

The Planning and Development (Local Planning Schemes) Regulations 2015, Schedule 2, Part 1, Terms used, states:

commercial, centre or mixed use zone means —

(a) if this Scheme includes the model provision set out in the Planning and Development (Local Planning Schemes) Regulations 2015 Schedule 1 clause 16 — a Commercial zone, Centre zone or Mixed Use zone; or

(b) otherwise — a zone (however named) the objectives of which as set out in this Scheme indicate that it is an area suitable for —

(i) a range of shops, offices, restaurants and other commercial outlets (whether or not in a town centre or activity centre); or

(ii) a wide variety of active uses on street level that are compatible with residential and other nonactive uses on upper levels;

Rather than using the 'Centre' model zone classification, the draft strategy seeks to use a similar zone classification being 'Town Centre'. It is proposed that the 'Town Centre' zone classification is used to replace the 'Commercial' zone classification. The naming reflects the central location of the current 'Commercial' zone properties, within the Boyup townsite.

4. SUBJECT LOTS

This scheme amendment is seeking to rename 'Commercial' zone properties, located within the Boyup townsite, to the 'Town Centre' zone classification. This scheme amendment is also seeking to include the Lot 1 Forrest Street and Lot 35 Barron Street, into the 'Town Centre' zone classification. The Lots 1 Forrest St and Barron St are currently zoned 'Residential. The Lot 1 Forrest St is owned by the Shire and is currently vacant. The neighbouring farm shop to Lot 1 Forrest St, has indicated an interest in expanding its operations. Likewise, the neighbouring farm shop to 35 Barron St (Lot 301 Forrest St – Boyup Co-Op), has also indicated interest to expand its operations.

The following figures illustrate the location of the 'Commercial' zone properties and the Lots 1 Forrest Street and 35 Barron Street.

Figure 3 – Lot 1 Forrest Street - aerial

Lot 1 Forrest Street directly adjoins 'Commercial' zone properties, one of which is currently used to sell farming equipment...see below figure.

Figure 4 – Lot 1 Forrest St - zoning

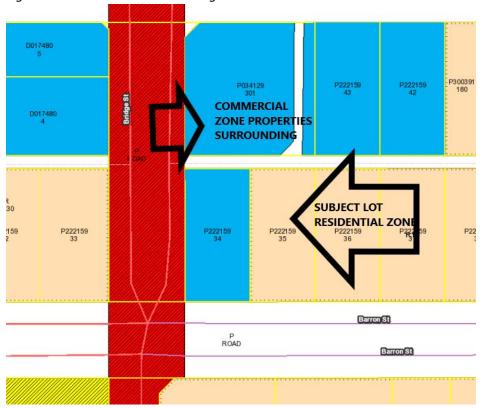

The Lot 301 (neighbouring farm supplies shop) is looking to expand its operations over the neighbouring Lots 34 and 35 Barron St.

Figure 6 – Lot 35 Barron St – zoning

The below figure illustrates properties currently zoned 'Commercial'. It is proposed that the 'Commercial' zone classification for these properties (along with the 'Residential' zone classification for Lot 1 Forrest St and Lot 35 Barron St) is transferred to the 'Town Centre' zone classification.

Figure 7 – Commercial zone properties in the Boyup town centre

5. **CONSULTATION**

Community and agency consultation will occur post Council resolution to prepare the scheme amendment and referral to the Environmental Protection Authority.

6. HERITAGE

The scheme amendment does not implicate any land designated for heritage consideration. The scheme amendment is simply proposing to change the zone classification of various properties within the Boyup townsite. The subject lots proposed for rezoning from Residential to Town Centre are not of heritage significance.

7. ENVIRONMENT

The rezoning and change of zone classification is not expected to create any detrimental environmental implications.

The Lot 36 Barron Street, which is located alongside the Lot 35 Barron Street (proposed for rezoning to allow commercial uses), is used for habitation purposes. Conditions of any commercial development or use of the Lot 35, can be imposed to mitigate any nuisance (e.g. noise walls).

8. INFRASTRUCTURE

The properties the subject of the scheme amendment have suitable services available, including sealed road frontage, stormwater management infrastructure, water mains and power mains.

9. PLANNING CONTEXT

The following section outlines how the proposed 'Town Centre' zoning suitably addresses the planning framework. In summary, the scheme amendment request is considered consistent with the planning framework.

Physical Characteristics

The subject properties are ideally located to be classified with a 'Town Centre' zone classification and to be used for commercial activities.

- The subject lots are within walking distance (300m 400m) to services including medical, shops and recreation.
- The Lots 35 Barron Street and 1 Forrest Street are located alongside other properties currently used or classified for commercial activities.
- The subject lots are suitably connected to utilities including stormwater, sealed roads, power, telecommunications and water.

Statutory

State Planning Strategy 2050

The State Planning Strategy 2050 (SPS) provides an overall strategic planning framework for the State. This strategy seeks to achieve sustainable and prosperous growth and to enable small settlements like Boyup Brook to maintain economic and community land use.

The proposed Amendment seeks to meet principles of the State Planning Strategy 2050, including:

- Assisting in the creation of regional wealth; and
- Providing diversity, liveability and connectedness.

State Planning Policy No.1 - State Planning Framework Policy (SPP1)

The SPP1 ensures all state and regional planning documents meet State Planning Strategy principles.

Principles of the SPP1 that the amendment seeks to abide by include:

- Environment:
 - o To protect and enhance the key natural and cultural assets; and
 - To deliver a high quality of life which is based on environmentally sustainable principles.
- Community: To respond to social changes and facilitate the creation of vibrant, safe and selfreliant communities.
- Economy: To actively assist in the creation of regional wealth with sustainable development principles.
- Infrastructure: To facilitate strategic development by making provision for efficient and equitable public utilities.
- Regional Development: To assist the development of regional Western Australia by taking account of the special assets and accommodating the individual requirements of the region.

State Planning Policy No. 3 – Urban Growth and Settlement (2006) (SPP3)

This Policy sets out the principles and considerations which apply to urban growth and settlement in Western Australia. The policy promotes a sustainable settlement pattern, supports building on existing communities, and seeks convenient access to employment and services.

The requested scheme amendment is consistent with SPP 3 given the site is conveniently close to services in the town centre and is an extension to existing commercial uses.

<u>Liveable Neighbourhoods 2009; and</u> Draft Liveable Neighbourhoods 2015

Liveable Neighbourhoods is a Western Australian Planning Commission (WAPC) operational policy that guides the structure planning and subdivision for greenfield and large brownfield (urban infill) sites.

The request to enable additional commercial development is considerate of Liveable Neighbourhood principles, such as ensuring:

- Easy access to services such as local shops and parks;
- Development is connected to utilities including stormwater, roads, power and water; and
- Design of the development will be considerate of streetscape amenity and solar efficiency.

State Planning Policy 3.7 – Planning in Bushfire Prone Areas

The intent of this policy is to implement effective, risk-based land use planning and development to preserve life and reduce the impact of bushfire on property and infrastructure.

The amendment document highlights the need for future development to occur in accordance with the Australian Standard 3959; Construction of buildings in bushfire prone areas.

Portion of Lot 1 Forrest Street is classified as being in a Bushfire Prone Area. Considering the distance to surrounding remnant vegetation, the bushfire hazard level for the site is expected to be low-moderate. The proposal to rezone the land to accommodate commercial development is therefore considered 'Acceptable' in accordance with A1.1 *Guidelines for Planning in Bushfire Prone Areas 2015.*

A1.1 Development location - The strategic planning proposal, subdivision and development application is located in an area that is or will, on completion, be subject to either a moderate or low bushfire hazard level, or BAL–29 or below.

Figure 8: Vegetation within 100m of the of the subject site

Draft Local Planning Strategy

The Shire has recently prepared a draft Local Planning Strategy, which recommends that the subject Lot 1 Forrest Street is transferred to a zone that enables 'mixed use'.

In accordance with the Shire's scheme, a mixture of uses may be considered at a property zoned 'Commercial', including 'single house', 'grouped dwelling' and/or a 'shop'. It is proposed that the 'Commercial' zone classification is transferred to the 'Town Centre' zone classification. No change to land use permissibility is proposed.

Local Planning Scheme No.2

The Lots 35 Barron Street and 1 Forrest Street are zoned 'Residential', with a density coding of R15 and R15/30 respectively. The key objective of the 'Residential' zone is to allow for housing development, however, demand has arisen for commercial type activities, as an expansion of an existing/neighbouring activities.

The Shires scheme has a dual density coding over the subject Lot 1 Forrest Street, which allows for a higher density of development, subject to the development of a purpose built effluent disposal system. The scheme states the following at clause 30(2):

Where a lot has dual density coding R15/30, the local government may approve residential development at a higher code where development is connected to a Septic Tank Effluent Disposal (STED) community scheme.

The above clause applies to land zoned 'Residential' and is administered in accordance with the R-Codes. The subject Lot 1 Forrest Street is the only property in the Shire that has a dual density coding of R15/30. Should the land zoning be converted to 'Town Centre', the above clause is not necessary or appropriate and should therefore be deleted.

As per the Shire's scheme, the 'Town Centre' zone will allow for both commercial and living type land uses.

As per the scheme, the objectives of the 'Town Centre' zone will be:

- To provide for a range of shops, offices, restaurants and other commercial outlets in defined townsites or activity centres.
- To maintain the compatibility with the general streetscape, for all new buildings in terms of scale, height, style, materials, street alignment and design of facades.
- To ensure that development is not detrimental to the amenity of adjoining owners or residential properties in the locality.

Amending the zoning of Lots 1 Forrest Street and 35 Barron Street will ensure there is a consistent approach to zoning in the area.

10. CONCLUSION

The proposal is to amend the Shire of Boyup Brook *Local Planning Scheme No.2* in order to enable an opportunity for mixed use, as recommended by the Shire's draft Local Planning Strategy. Rezoning of the land to allow for a mixture of uses, including commercial, may allow for economic growth of the townsite.

The proposal to transfer the 'Commercial' zone classification to the 'Town Centre' zone classification is considered acceptable in accordance with the Commissions Regulations and better emphasises the location characteristics of the commercial properties in the centre of the Boyup townsite.

The proposed Amendment is justified on the following grounds:

- 1. The subject land is not used or intended to be used for residential (grouped housing);
- 2. Given demand for the expansion of neighbouring commercial businesses, development for commercial activity is more likely than for housing.

This report confirms that the scheme amendment request is consistent with the planning framework and that the subject lots are considered to be both suitable and capable for accommodating mixed uses. The amendment proposal provides a consistent approach to the zoning in the precinct.

The support of the WAPC and the Hon. Minister for Planning is requested to approve the scheme amendment to transfer the zoning of lots from the 'Residential' zone to the 'Town Centre' zone and to change the 'Commercial' zone classification in the scheme text and maps, to the 'Town Centre' zone classification.

AMENDING TEXT

PLANNING AND DEVELOPMENT ACT 2005

LOCAL AUTHORITY: SHIRE BOYUP BROOK

DESCRIPTION OF TOWNLOCAL PLANNING SCHEME NO.2

PLANNING SCHEME:

TYPE OF SCHEME: LOCAL PLANNING SCHEME

SERIAL No. OF AMENDMENT: AMENDMENT No. 22

The Shire of Boyup Brook under and by virtue of the powers conferred upon it in that behalf by the *Planning and Development Act 2005*, hereby amends the above Local Planning Scheme by:

- 1. Rezoning Lot 1 Forrest Street, Boyup Brook from the 'Residential' zone classification to the 'Town Centre' zone classification and amending the Scheme maps accordingly, which includes deleting the density coding R15/30.
- 2. Rezoning Lot 35 Barron Street, Boyup Brook from the 'Residential' zone classification to the 'Town Centre' zone classification and amending the Scheme maps accordingly, which includes deleting the density coding R15.
- 3. Amending the scheme maps by replacing the 'Commercial' zone classification with the 'Town Centre' zone classification.
- 4. Deleting the clause 30(2) as follows:

Where a lot has dual density coding R15/30, the local government may approve residential development at a higher code where development is connected to a Septic Tank Effluent Disposal (STED) community scheme; and

- 5. Re-numbering subsequent sub-clauses accordingly.
- 6. Amend text in the "Table of Contents" by:
 - a. At Part 3, 28, replacing 'commercial' with 'Town centre'.
- 7. Amend text at Table 2 by:
 - a. Replacing the 'Commercial' zone classification with the 'Town Centre' zone classification.
- 8. Amend text at Table 3 by:

- a. Replacing 'Commercial' (column 2) with 'Town Centre'.
- 9. Amending text at clause 28 and Table 6 by:
 - a. Replacing the words 'COMMERCIAL' and 'Commercial', with the words 'TOWN CENTRE' and 'Town Centre' respectively.
- 10. Amending text at schedule 4, under column 1 (land use and/or development requiring advertisement), row 3 (Property Transactions) by:
 - a. Replacing the word 'Commercial' at b), with the words 'Town Centre'.

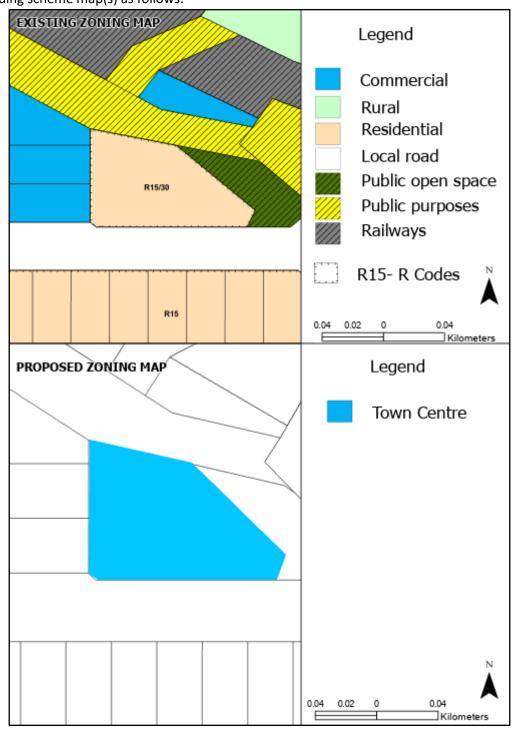

The Amendment is a 'Standard' amendment under the provisions of the *Planning and Development* (Local Planning Schemes) Regulations 2015 for the following reasons:

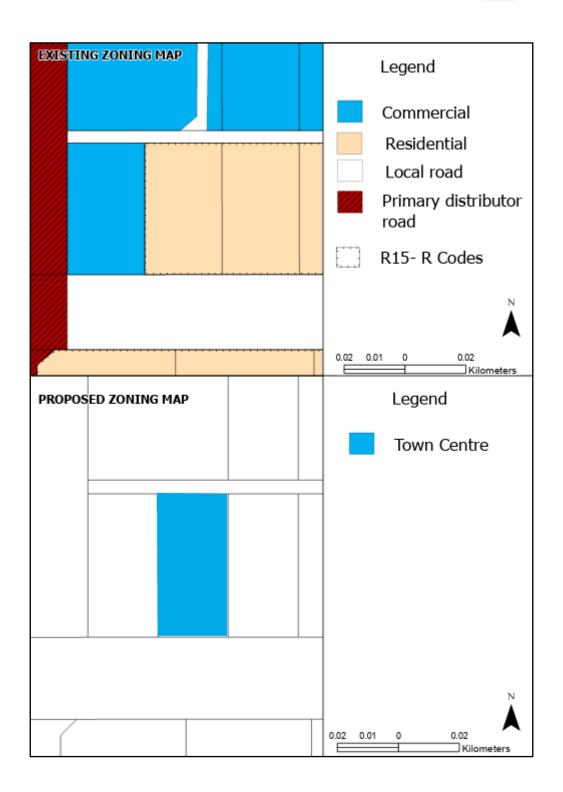

- a) The amendment would have minimal impact on land in the scheme area that is not the subject of the amendment; and
- b) The amendment does not result in any significant environmental, social, economic or governance impacts on land in the scheme area.

RESOLUTION

PLANNING AND DEVELOPMENT ACT 2005 RESOLUTION TO ADOPT AMENDMENT TO LOCAL PLANNING SCHEME SHIRE OF BOYUP BROOK LOCAL PLANNING SCHEME NO. 2 AMENDMENT NO. 21

Resolved that the local government, pursuant to Section 72 of the *Planning and Development Act 2005*, amend the above Local Planning Scheme by:

1. Rezoning Lot 13129 Bridgetown Boyup Brook Road, from the 'Rural' zone and the 'Public purposes' reserve (purpose: water and parkland), to the 'Light Industry' zone.

The Amendment is a 'Standard' amendment under the provisions of the *Planning and Development (Local Planning Schemes) Regulations 2015* for the following reason(s):

- a) The amendment would have minimal impact on land in the scheme area that is not the subject of the amendment; and
- b) The amendment does not result in any significant environmental, social, economic or governance impacts on land in the scheme area.

Dated this	day of	2022
------------	--------	------

Dale Putland CHIEF EXECUTIVE OFFICER

SCHEME AMENDMENT REPORT

1. INTRODUCTION

This Scheme amendment proposes to modify the Shire's *Local Planning Scheme No.2* zoning and reservation, for Lot 13129 Bridgetown Boyup Brook Road, from the 'Rural' zone and the 'Public purposes' reservation, to the 'Light Industry' zone.

The subject Lot was previously used to yard and wholesale sheep. A portion of the Lot is currently used for the washing of trucks.

The subject land is ideal for industrial type land uses. A large portion of the land is flat, majority cleared, partly sealed, well buffered to sensitive land uses and has frontage to a major road.

The current 'Rural' zoning is not appropriate for this small, partly developed piece of land. The land is owned by the Shire of Boyup Brook. The Shire propose to rezone the land, to enable a purchaser/developer to undertake light industrial type activities.

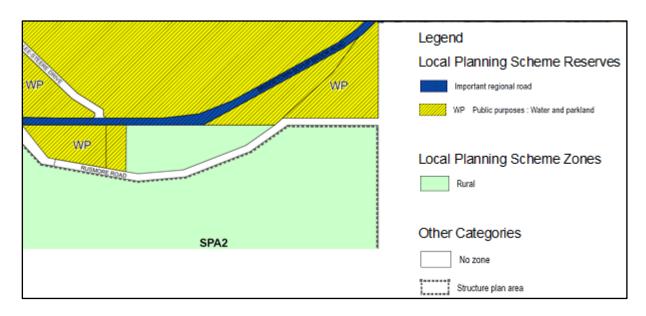

2. SUBJECT LOT

The following illustrates the subject Lot of the amendment proposal.

3. CURRENT ZONE, RESERVATIONS AND USES

The following illustrates the current scheme zone and reservation.

Current land use and proposed land use include:

Lot / Reserve No.	Area	Zone / Reservation	Current Land Use	Proposed Land Use
Lot 13129 R33552	Total Lot Area; 3.9ha. Area proposed for rezoning; 3.9ha.	Portion 'Rural' Portion 'Public Purpose' (Water & Parkland)	 Outbuilding Truck wash facility Access roads Remnant vegetation (parkland cleared) 	Light industrial activities.

Lot 13129 was predominantly used for the holding and selling of sheep (saleyards). The subject site is now:

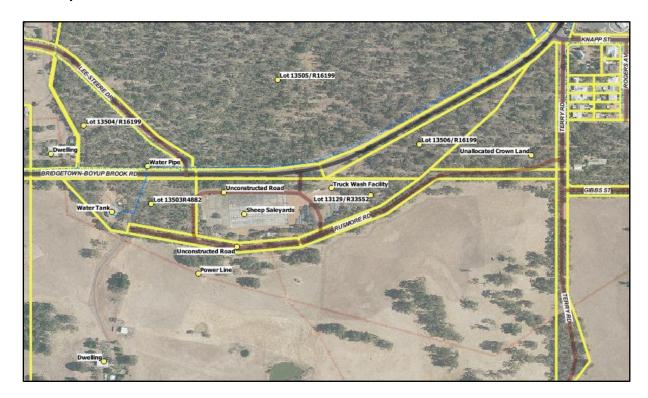

- 1. Used for washing trucks designated area with effluent management system;
- 2. Partly vacant hardstand area and small building (old canteen) leftover from saleyards; and
- 3. Partly vegetated.

Land to the south and east of the subject Lot is zoned 'Rural' and land to the north and west is reserved for 'Public Purpose' (Water & Parkland).

The 'Rural' zoned land is currently used for farming purposes (livestock grazing and cropping) and is designated in the scheme for future rural residential development (Structure Plan Area 2).

The 'Public Purpose' land is used for passive recreation (walking) and active recreation (mountain-bike and horse riding). The land was previously used for water catchment. The is a water tank to the west, which is used for water storage.

Residential dwellings are located at varying distances, the closest being approximately 255m away to the north/west. The following maps illustrate land uses within the vicinity of the subject Lot.

4. **COMMUNITY CONSULTATION**

In accordance with requirements of the *Planning and Development (Local Planning Schemes) Regulations 2015,* the amendment is required to be advertised for 42 days. A report and any submissions are then presented to Council and the Minister for final consideration of the Amendment.

5. ENVIRONMENT

Topography

Central to the site is a flat area ideally suited to development. There's a rising embankment on the west, south and east boundaries and declining embankment on the northern boundary towards the Bridgetown Boyup Brook Road.

The rising embankments form suitable natural noise and amenity buffers to adjacent existing and future designated land uses.

Geology and Hydrology

The soil in the subject area is described as *DMg Dalmore – g; meaning the soil parent material consists of gravels, loamy duplex soils and sandy duplex soils.*

The DMg soil type is suitable for development and onsite effluent disposal.

The Hydraulic gradient for the site is relatively flat with surface water discharging to the north - adjacent to the Bridgetown Boyup Brook Road. There are no distinct surface drainage lines or evidence of groundwater at depths of 2 metres.

Stormwater disposal is expected to be facilitated through:

- a) Infiltration and evaporation;
- b) Attenuated surface runoff into adjacent landscaped areas and an open drain adjacent to Bridgetown/Boyup Brook Road; and
- c) Detention basins, developed at the time of subdivision and industrial development.

Remnant Vegetation

Remnant vegetated areas range from good to excellent condition.

The remnant vegetation at the eastern end of Lot 13129 is dominated by Eucalyptus wandoo (Wandoo) and E. marginata (Jarrah) trees over little to no understory.

Towards the western end of Lot 13129, the vegetation transitions to E. marginata and Corymbia calophylla over tall sparse Banksia shrubs and low to medium shrubs and sedges. Dominant understorey species include Banksia grandis, Hakea lissocaprha, Billardiera heterophylla, Leucopogon capitellatus, Acacia pulchella, Xanthorrhoea preissii.

Common weeds can be found throughout and include; Veldtgrass (Ehrharta calycina), Freesia (Freesia hybrids), and Wild Oats (Avena fatua). There are some planted eucalypts on the southern and western periphery of the saleyards that are not endemic to the area and should be removed to reduce their potential as weeds in the surrounding native vegetation. The weeds Marshmallow (Malva parviflora), Nightshade (Solanum nigrum) and Wild Radish (Raphnus raphanistrum) are growing adjacent and within the saleyard lots.

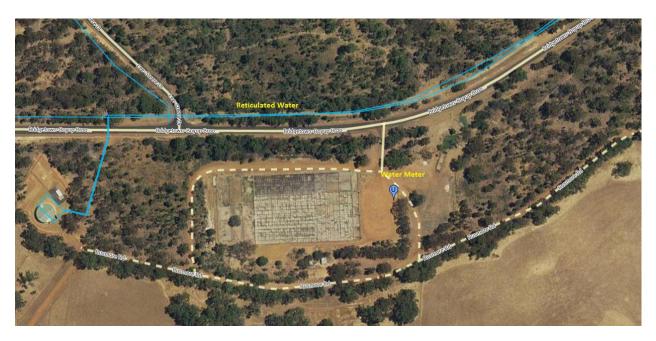

6. INFRASTRUCTURE

Access

The subject lot has direct frontage to the Bridgetown Boyup Brook Road. Access to the proposed industrial usage can be achieved by an existing crossover, which has excellent line of site.

Services

Reticulated water is available to the subject site.

Power and telecommunication infrastructure run past the subject site. New transformer and green domes will need to be constructed to accommodate industrial land uses at the subject property.

The gravel, loamy duplex, and sandy duplex soils account for an 'A1' rating, meaning the land is suitable for septic tanks.

Disposal of effluent is proposed to be by way of onsite effluent disposal systems as scheme sewer is not available. Development may-be required to utilise high performance nutrient retaining systems.

7. PLANNING CONTEXT

The following section outlines how the proposed 'Light Industry' zoning suitably addresses the planning framework.

In summary, the scheme amendment request is considered consistent with the planning framework.

The subject land is partly zoned 'Rural' and partly reserved 'Public Purpose' for 'Water & Parkland'.

Public Purpose Reserve

The Shire of *Boyup Brook Local Planning Scheme No.2* states the following at section 14. Local Reserves:

- (1) Local reserves are shown on the Scheme Map according to the legend on the Scheme Map.
- (2) The objectives of each local reserve are as follows:

Public Purposes - To provide for a range of essential physical and community infrastructure.

The Public Purposes area, the subject of the amendment proposal is not used for the purpose deemed on the scheme map. The land was previously used to capture water for domestic uses. Reticulated water is now supplied via Bridgetown (neighbouring town).

Rural Land

The scheme states at section 25 RURAL ZONE:

Council shall encourage the continued use of land within the Rural Zone for the entire spectrum of broadacre and intensive rural activities except in close proximity to the town where such activities, by their very nature, may detract from the residential and environmental quality within the town.

Lot 13129 is not used and is not suitable for agriculture production and no longer contributes to agriculture by way of saleyards.

Industry

The zoning table in the Shire's scheme does not support industrial uses in the 'Rural' zone or the 'Public Purpose' reservation. The amendment is seeking to enable a light industrial use to occur.

The Shire's scheme defines Light Industry to mean:

...premises used for an industry where impacts on the amenity of the area in which the premises is located can be mitigated, avoided or managed.

The site is physically suited to accommodating light industrial activities for the following reasons:

The site is currently utilised for industrial type activities (truck wash-down facility).

- The site is flat, meaning extensive earthworks is not necessary to prepare the site for development.
- The site is clear of environmental impediments; the site is not susceptible to flooding and the site is majority clear of vegetation.
- There is no registered land contamination on the site.
- The site is buffered to surrounding sensitive uses by a suitable distance, by topography and by vegetation.
 - There is well-established remnant vegetation on the fringe parts of the site. The vegetation does not appear to have any significant environmental value but does provide a significant landscape buffer.
- The site has connection capabilities to utilities/infrastructure including sealed roads, power, telecommunications and water.
 - The Bridgetown-Boyup Brook Road, which runs east-west along part of the northern part of the site, is a Main Roads WA controlled Primary Distributor Road. Main Roads WA will be requested to provide their comments on the proposal from a traffic access perspective. A road reserve (Rusmore Road, a gravel road) runs along the southern boundary of the site.
 - There is a Western Power Overhead 12.7 kV Distribution Line, which runs to the southern boundary of the site.
 - There are two Water Corporation water pipes running along the northern boundary of the Bridgetown-Boyup Brook Road road reserve.
 - There is no mains sewer provision in the vicinity of the site and on-site effluent disposal will be required.

State Planning

State planning documents that relate to the subject land include:

- State Planning Strategy 2050
- State Planning Policy No.1 State Planning Framework Policy;
- WA State Sustainable Strategy;
- State Planning Policy No. 4.1 State Industrial Buffer;
- Development Control Policy 4.1 Industrial Subdivision; and
- State Planning Policy 3.7 Planning in Bushfire Prone Areas 2015, the Guidelines for Planning in Bushfire Prone Areas 2015, the Australian Standards 3959 – Construction of Buildings in Bushfire Prone Areas and the Office of Bushfire Risk Management -Bush Fire Prone Area Mapping.

<u>State Planning Strategy 2050</u> and <u>State Planning Policy No.1 - State Planning Framework Policy</u>

The State Planning Strategy 2050 (SPS) provides an overall strategic planning framework for the State.

The SPS is supported by the State Planning Policy No.1 - State Planning Framework Policy which ensures all state and regional planning documents meet SPS principles. There are five key principles that are advocated by the SPS:

 Environment: To protect and enhance the key natural and cultural assets of the State and deliver to all West Australians a high quality of life which is based on environmentally sustainable principles.

- 2. Community: To respond to social changes and facilitate the creation of vibrant, safe and self-reliant communities.
- 3. Economy: To actively assist in the creation of regional wealth, support the development of new industries and encourage economic activity in accordance with sustainable development principles.
- 4. Infrastructure: To facilitate strategic development by making provision for efficient and equitable transport and public utilities.
- Regional Development: To assist the development of regional Western Australia by taking account of the special assets and accommodating the individual requirements of each region.

The proposed Amendment seeks to meet these principles, specifically to assist in the creation of regional wealth.

WA State Sustainability Strategy

The State Sustainability Strategy (SSS) is a sustainability framework, comprising sustainability principles. The SSS requires that economic, social and environmental factors be integrated by simultaneous application of the SSS principles with mutually supportive benefits and minimal trade-offs.

State Planning Policy No. 4.1 - State Industrial Buffer

The purpose of the State Planning Policy 4.1 is to provide for the security of industrial zones and for the safety and amenity of surrounding land uses. The policy establishes principles to define and secure buffer areas and to determine who should pay for them. The extent of the buffer area depends on particular circumstances such as scale of operations. The buffer policy states:

In the case of industries of a light/service nature...the impacts can usually be retained onsite.

For light industrial type activities, setbacks to property boundaries are the norm and are effective in forming buffers, particularly when combined with landscaping.

The policy lists categories of industry which may be required to provide off-site buffers and light industry is not listed. The types of industries expected in the light industrial area are not expected to generate emissions including noise, dust, odour, fumes, lighting overspill or high risk levels of a capacity that will impact on the neighbouring land uses of rural, public purpose, residential and special rural.

The state industrial buffer policy defines light industry as:

Light Industry—means an industry; – in which the processes carried on, the machinery used, and the goods and commodities carried to and from the premises, will not cause any injury to, or will not adversely affect the amenity of the locality by reason of the emission of light, noise, electrical interference, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water or other waste products; and – the establishment of which will not, or the conduct of which does not, impose an undue load on any existing or proposed service for the supply or provision of water, gas, electricity, sewerage facilities, or any other like services.

<u>Development Control Policy 4.1 - Industrial Subdivision</u>

This policy statement provides guidance on the matters considered by the Commission when determining applications for industrial subdivision throughout the State. These include such matters as the design and shape of industrial lots, road layout, servicing and open space requirements.

The policy ensures that the design of an area is compatible with the surrounds by introducing measures such as landscaping and that good access is provided to and from the industrial area to cater for large and cumbersome vehicles.

The scheme amendment seeks to retain the subject Lot in its current size. Servicing to the Lot is available by water and power lines running adjacent. Traffic would enter and exit the site as per the current established crossover. There is sufficient area on-site to enable turning movements and parking.

State Planning Policy 3.7 - Planning in Bushfire Prone Areas 2015

In accordance with State Planning Policy 3.7, the strategic intent is to ensure that:

- 1. Development is located in areas where the bushfire hazard assessment is or will be of a moderate or low risk, and the risk can be managed; and
- 2. Development in areas where extreme hazard applies, demonstrates that the risk can be managed to the satisfaction of the Department of Fire and Emergency Services and the decision-maker.

As indicated by the *Office of Bushfire Risk Management - Bush Fire Prone Area Mapping,* the subject area is within a bushfire prone area.

The subject site is at medium to extreme risk of bushfire attack.

If necessary vegetation clearing on the fringes of the existing developed areas, within the confines of the existing Lot 13129, may-be undertaken to ensure that bushfire risk can be managed at a moderate or low risk (max BAL29).

At the development stage, it is recommended that a Bushfire Attack Level assessment is undertaken in accordance with the SPP 3.7 to determine the extent of low fuel area required around development and/or the level of construction required to mitigate against bushfire.

State Planning Policy 2.9 - Water Resources

The objectives of this policy are to:

- 1. Protect, conserve and enhance water resources that are identified as having significant economic, social, cultural and/or environmental values;
- Assist in ensuring the availability of suitable water resources to maintain essential requirements for human and all other biological life with attention to maintaining or improving the quality and quantity of water resources; and
- 3. Promote and assist in the management and sustainable use of water resources.

Water resource management can be met at the development stage of the planning process. The land within the subject lot slopes towards the Bridgetown Boyup-Brook Rd. Future development would need to ensure that maximum retention and infiltration occurs on site through the use of individual soak wells, retention basins or other measures as deemed necessary. Post-development flow rates would be attenuated to pre-development

flow rates through the provision of adequate temporary detention storage. Oil and grease traps could be provided to the satisfaction of the Local Government to ensure that nutrient export is appropriate.

Government Sewer Policy.

The policy guides future strategic planning, subdivision and development for the provision of sewage disposal in Western Australia.

The policy promotes reticulated sewerage as the best disposal method for sewage. It requires all new subdivision and development to be connected to reticulated sewerage where available or considered necessary on health, environment or planning grounds.

Where reticulated sewerage cannot be provided, the policy provides detailed site requirements for on-site sewage treatment and disposal.

The subject lot is 3.9ha and is located over 1.5km to the Blackwood River. Given the size and location of the property, the development of an effluent disposal system is not expected to impact on any environmentally sensitive areas or members of the public. An effluent disposal system has already been developed at the site. A new system would require an approval in accordance with the Government Sewer Policy.

8. CONCLUSION

The proposal is to transfer the Shire's Local Planning Scheme reservation and zoning, for Lot 13129, to make applicable (light industry) with current and proposed land use.

The proposed Amendment is justified on the following grounds:

- 1. The subject site is not used or intended to be used for the current dedicated reservation or zone:
- 2. The proposed 'Light Industry' zone will be appropriately serviced and developed considerate of bushfire and environmental parameters;
- 3. Development of the site will assist in the creation of regional wealth.

APPENDIX 1 – Certificate of title

10 June 2022

To Shire of Boyup Brook,

Please see reasons below for our request for a relaxation of the current outbuilding policy, for the application for development approval submitted for 108 Ridge View Avenue Boyup Brook WA 6244.

- We require the extra 1.2 mt height for machinery and storage.
- At "natural ground level" the shed at its highest point will only be 900mm higher than the 4.8mt max height for outbuildings as per the current out building policy.
- And at the lowest point it is 4.5mt below the 4.8mt height requirement. Please see attached drawing.
- The shed size comes in at 216m2 16m2 over the out building policy per individual outbuilding. Although we are still considerably under the total outbuilding size requirement of 400m2 which we will have a combined total of 272m2.

Sincerely yours,

Joanne Harding

0409105299

Lot 108 Ridge View Ave

Boyup Brook WA.6244

We purchased the property at 194 Banks Road in 2018 and travel down from Perth on a regular basis to Boyup Brook. As time has progressed and we have planted more and more trees and with no storage on the property, we have had to bring more equipment like a fire pump for irrigation, rakes, shovels, line trimmers, mowers, etc with us to be able to do maintenance on the property such as keeping firebreaks, on top of camping & cooking gear to stay on the property. This means, that at times, we would be well over our vehicles safe weight limits.

To prevent us from overloading our vehicle, we had looked at storage options for our equipment and chose the proposed location for a shipping container. This location was chosen because it was somewhat obscured from passing traffic on Banks Road and would hopefully make it a little less inviting. It was also closer to the dam, and it would make moving a fire pump around easier.

As we saved the money for the container, we were hit with a large mechanical bill on a trip down to the property. By the time we were ready to look at containers again, the prices had gone through the roof due to a global shortage caused by the pandemic. After reassessing the situation, we felt that as a long-term solution, a shed would be more practical, also given the money we would now need to spend. Having a secure storage area for this equipment, also means we will have safer journeys back and forth.

We have planted some citrus in this area and will also plant fruit and nut trees here. Being able to store tools and equipment that we will also share with our neighbours directly behind us, will make it easier to perform maintenance in this area and easier access for them. Over the summer period our trips are every two weeks to fill some IBCs that we have set up on a timer system to irrigate the citrus. Something we are not able to do when there are fire & vehicle movement bans.

Our plans are to build a 6 x 4, skillion shed, for equipment storage and will be fitted with a solar array to provide power to water pumps on a timer, which will provide irrigation, fill tanks, and help us to move water around the property for other purposes. It will be a long-term part of our property works.

Whilst our intention is to purchase a house in the township and move to Boyup Brook before we are ready to build a house on the property, a fulltime move is still a couple of years away.

Moving the building parcel to incorporate the shed would mean that we would build a house right next to the dam, in the gully of the property where it becomes very wet and boggy over winter, as we collect a lot of rain run off from the properties elevated to our east. This water then on flows to fill the large dam to our west that is available for firefighting.

Since purchasing the property, we have planted trees & shrubs on the east, south and western fence lines of the property each winter and will continue to do so for several more years to come. These trees are to provide a wind break and screening from the surrounding properties, we are confident that as the current trees grow and future trees are planted as we develop the property, that the structure will be sufficiently screened from neighbouring properties and traffic on Banks Road in the next few years.

We understand that the Shire wants to keep all structures within the prescribed building parcels for aesthetic reasons and not having them scattered all over properties, this is the only structure that we would look at outside of these boundaries. For the short term, safer trips to Boyup Brook with secure storage of our equipment and long term, a multipurpose location for equipment that will be shared to maintain two properties and be able to power water pumps.

Sorry we were unable to attend the meeting and we appreciate you hearing our story. We are happy to discuss any questions or concerns over the phone.

ADJOINING OWNERS COMMENT DEVELOPMENT APPLICATION REQUIRING ASSESSMENT

PLEASE BE AWARE THAT YOU ARE UNDER NO OBLIGATION TO SIGN THIS PROFORMA

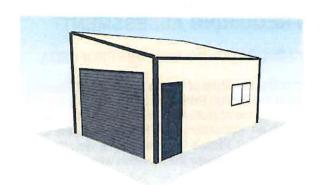

Where an application seeks to vary the standards prescribed under the Shire of Boyup Brook Local Planning Scheme 2; a Local Planning Policy; or is to be assessed against the Design Principles of the Residential Design Codes (R-Codes), the applicant must demonstrate to the Shire how the objectives of the Scheme, Policy and/or R-Codes are being met. When considering whether to support such an application, the Shire will seek the views of adjoining owners, whose property may be affected by the development. Please take the time to view the applicant's plans in detail prior to commenting on the proposal. Should you wish to discuss the variation with the Shire prior to signing the form please contact the Shire on 9765 1200.

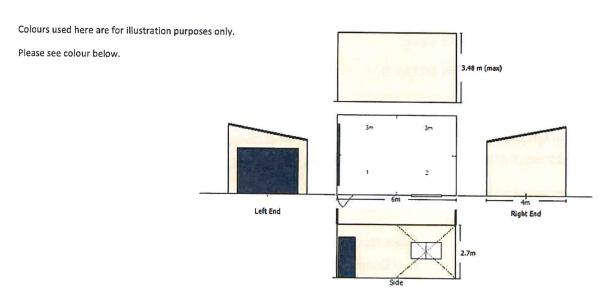

It should be advised that in determining the application your comments will be taken into account, however the Shire is not obliged to support your views.

Warren Blackwood Alliance of Councils

Climate Change Policy Statement

April 2022

1.0 Policy Statement

The Warren Blackwood Alliance of Councils acknowledges:

- I. The science is clear: climate change is occurring and greenhouse gas emissions from human activities are the dominant cause.
- II. Climate change threatens human societies and the Earth's ecosystems.
- III. Urgent action is required to reduce emissions, and to adapt to the impacts from climate change that are now unavoidable.
- IV. A failure to adequately address this climate change emergency places an unacceptable burden on future generations.

The Warren Blackwood Alliance of Councils is committed to addressing climate change.

The Warren Blackwood Alliance of Councils is calling for:

- I. Strong climate change action, leadership and coordination at all levels of government.
- II. Effective and adequately funded Commonwealth and State Government climate change policies and programs.

2.0 Rationale

2.1 Purpose and intent of this document

Climate change is a key issue for the Warren Blackwood Alliance of Councils (WBAC) that impacts almost all aspects of our operations and responsibilities and goals.

This Policy Statement has been prepared by the Warren Blackwood Alliance of Councils Climate Change Impact Reference Group for endorsement by each of the member Councils.

All member Councils will strive to promote this Policy Statement and to act consistently with its contents.

2.2 The science is clear

International scientific consensus is that climate change is occurring, and human activities are the dominant cause.

The *Fifth Assessment Report*, of the scientific consensus-based Intergovernmental Panel on Climate Change (IPCC), found:

Warming of the climate system is unequivocal, and since the 1950s, many of the observed changes are unprecedented over decades to millennia. The atmosphere and ocean have warmed, the amounts of snow and ice have diminished, sea level has risen, and the concentrations of greenhouse gases have increased¹.

Most aspects of climate change will persist for many centuries even if emissions of CO_2 are stopped².

Surface temperatures will remain approximately constant at elevated levels for many centuries after a complete cessation of net anthropogenic CO₂ emissions. Due to the long time scales of heat transfer from the ocean surface to depth, ocean warming will continue for centuries. Depending on the scenario, about 15 to 40% of emitted CO₂ will remain in the atmosphere longer than 1,000 years. It is virtually certain that global mean sea level rise will continue beyond 2100, with sea level rise due to thermal expansion to continue for many centuries³.

Further, the IPCC has also found:

It is extremely likely [95–100%] that human influence has been the dominant cause of the observed warming since the mid-20th century.⁴

2.3 Climate change is a global threat, and Australia has committed to being part of the solution

As a signatory to the Paris Agreement under the United Nations Framework Convention on Climate Change (UNFCC) and the United Nations Sustainable Development Goals (SDGs), Australia has committed to taking action on climate change and to ensuring that mitigation and adaptation action is equitable and consistent with the aims of the SDGs.

The Paris Agreement expressly recognises the importance of engagement at all levels of government⁵. The WBAC is committed to contributing to state, national and international

emissions reduction targets that are required to achieve the Paris Agreement goal of limiting global temperature rise to well below 2° Celsius and to pursue efforts to limit the temperature increase even further to 1.5° Celsius.

The WBAC acknowledges that current worldwide commitments under the Paris Agreement are insufficient to achieve even the 2° Celsius goal⁶. Australia is a developed country with among the highest per capita greenhouse gas (GHG) emissions in the world⁷. Recognising this, the WBAC calls on the Commonwealth Government show international leadership, by committing to a more ambitious Paris Agreement target.

The WBAC recognises that both the impacts of climate change and the policy responses required to contribute to the avoidance of dangerous climate change have significant equity implications⁸. These equity considerations have domestic and international dimensions, for both present and future generations and for the survival of other species. Climate change disproportionately affects disadvantaged and marginalised groups⁹ including the poor and rural and regional communities.

The WBAC supports an equitable transition to a carbon constrained world:

- globally, the right of developing countries to increase their share of global wealth in ways that remain within the ecological capacities of the planet;
- domestically, the need to equitably share the cost of climate change adaptation and mitigation and ensure disadvantaged and marginalised groups receive adequate support. This includes provision of support and incentives for communities impacted by the transition (eg, by fostering innovation, and supporting workforce adjustment packages and new employment opportunities).

The WBAC supports the United Nations Sustainable Development Goals, and supports climate change action as part of a broader sustainable development agenda.

2.4 Local Governments are already acting on climate change, but all levels of Government must act

For Australia to meet its international obligations, all levels of government must act. The Western Australian and Commonwealth Governments have an obligation to address climate change in partnership with Local Government, and in consultation with the community.

The WBAC calls on the Western Australian and Commonwealth Governments to develop a formalised coordinated approach, such as in the form of a Commonwealth/State/Local Government partnership agreement or Intergovernmental Agreement, establishing consistent and coordinated principles, objectives and actions across Australia that provides for long-term planning to address climate change.

The strategic, long-term planning that the WBAC seeks from the Western Australian and Commonwealth Governments includes:

- adequate ongoing funding for essential research, science and innovation to underpin climate change policy initiatives and program design¹⁰
- taking direct responsibility for the delivery of mitigation actions, adaptation and resilience planning in areas that lend themselves to centralised coordination at

- Western Australian or Commonwealth Government level (e.g. through ensuring State Planning Policies are consistent with climate change mitigation priorities);
- ➤ embedding climate change mitigation and adaptation considerations in Government projects and policies (government procurement, land management, development, and financial investment strategies that move away from fossil fuels etc.);
- partnering with and resourcing Local Governments to deliver community emissions reduction programs that are most effectively implemented at the Local Government level:
- > removing existing legislative and regulatory barriers to climate mitigation and adaptation actions by Local Governments;
- > and ensuring all decisions are guided by the Precautionary Principle.

The WBAC calls on the Commonwealth Government to develop and implement a national plan for action to:

- meet Australia's international obligations;
- ensure Australia is prepared to adapt to the impacts of climate change; and
- navigate the pathway to a low carbon economy, fostering innovation, new employment opportunities and economic growth.

2.5 The WBAC urges effective mitigation action

The WBAC recognises that there is a global climate emergency which requires urgent action.

The WBAC is committed to continuing to reduce operational GHG emissions and to continue supporting the reduction of GHG emissions in the community.

The WBAC recognises that Australia has the capacity to contribute to global climate change mitigation, by reducing emissions now, in a way that creates positive opportunities for communities, business and the economy.

The WBAC acknowledges a successful response to the challenge of climate change requires cross-sectoral action by government, business and the community.

However, there are insufficient long-term Western Australian and Commonwealth Government plans or resources directed to climate change action. Australia and the world is seeing a shift away from fossil fuels towards energy efficient and renewable technologies that includes widespread uptake of rooftop solar¹¹, battery storage¹², energy trading¹³, virtual power plants¹⁴, electric vehicles¹⁵, energy efficiency and energy productivity¹⁶. The market, business, insurers, many Local Governments and their communities are moving in this direction. The WBAC is calling on the Western Australian and Commonwealth Governments to support Local Governments to transition to a low carbon, energy efficient economy.

The WBAC considers a wide range of policy measures - from regulatory intervention and market-based mechanisms (such as an emissions trading scheme) through to voluntary schemes, education and behaviour change programs - are required to successfully achieve emissions reduction targets.

As part of the required national plan for action, **The WBAC calls on the Commonwealth Government to** put in place efficient, effective and equitable measures to drive national

emissions reductions.

Local Governments are in a unique position to drive and implement mitigation programs, foster innovation and support sustainability at the community level, and has had successful collaborations and partnerships to implement such programs in the past¹⁷.

The WBAC calls on the Commonwealth Government to partner with Local Governments in its efforts to further reduce GHG emissions, including through:

- renewable energy projects (small scale and large scale);
- energy efficiency projects (eg, mass LED public lighting retrofits);
- > waste management;
- > enabling take-up of new renewable and sustainable technologies; and

The WBAC calls on the Western Australian Government to:

- follow the lead of the other States and Territories and introduce a State-level renewable energy and/or emissions reduction target;
- ➤ ensure that statutory planning policies are consistent with climate change mitigation priorities (eg, maintaining and increasing urban forest to reduce heat island effect, best practice building energy efficiency etc.); and
- drive mass LED public lighting retrofits, by addressing the regulatory hurdles and unaligned incentives that act as a disincentive to the uptake of low cost, energy efficient public lighting.
- ➤ Deliver amendments to the Local Government Act (Financial Management)
 Regulations, including an amendment to Regulation 54 to include 'renewable energy'
 as a prescribed charge.
- Accelerating the take up of low or zero emissions vehicles
- Accelerating the installation of electric vehicle charging stations.

2.6 The WBAC urges effective adaptation and resilience planning

The WBAC is committed to the common goal of ensuring that Western Australia's human communities and natural ecosystems have the resources and assistance to enable them to build maximum resilience and adapt to climate change impacts that are now understood to be unavoidable.

The WBAC asserts that it is the responsibility of all spheres of Australian Government to ensure that their decisions, policies and programs take into consideration the likely impact of climate change on current and future human settlements, natural resources and ecosystems and facilitate adaptation to these. These include but are not limited to disaster relief, national security, environment, energy, infrastructure and land use planning, water, housing, health and transport.

The WBAC notes there are some policies, programs and limited funding for coastal adaptation in Western Australia, and a body of work completed in relation to bushfire planning and management. While this action is welcome, it is insufficient, and there is currently only *minimal* capacity and resourcing available to adapt to other effects of climate change, such as changes in temperature and rainfall, extreme weather events such as

heatwaves and floods, flow-on effects such as the health and social impacts of climate change.

In many cases, Local Governments (and particularly Shires) do not have the financial resources to shoulder the cost of implementing adaptation measures alone. This must be a shared responsibility.

Effective adaptation and resilience planning by Western Australian and Commonwealth Governments includes:

- a strategic approach to progressing and funding action for climate change adaptation and building resilience;
- > adequate assistance, including funding, for Local Governments and Commonwealth and State agencies engaged in adaptation action;
- recognising and planning for the impacts of climate change on biodiversity and agricultural productivity, particularly in relation to biosecurity;
- sustainable management of water resources;
- providing greater certainty for Local Governments managing their risk and liability flowing from adaptation planning decisions;
- > a State-Wide Coastal Hazard Map;
- coastal management legislation in Western Australia to define and establish principles, objects, actions, roles and responsibilities for integrated coastal zone management, with specific reference to planned and managed retreat;
- > ensuring the Western Australian planning system adequately incorporates consideration of climate change effects and adaptation issues; and
- ➤ hazard identification and planning beyond coastal planning, into current and expected effects of changes on extreme weather events, bushfires, biodiversity, invasive flora and fauna, health, social impacts etc.

The WBAC is also calling for national and state emergency management and disaster relief policies that adequately incorporate climate change in their planning and implementation. The Disaster Funding Recovery Arrangements Western Australia (DFRAWA) financial measures need to provide funding to reinstate a damaged or destroyed asset to a more disaster resilient standard, where this is an appropriate and cost effective response based on likely recurrence of the disaster event.

Appendix B

Background Information

Climate change in Australia¹:

- Australia's climate has warmed in both surface air temperature and surrounding sea surface temperature by around 1°C since 1910.
- By late this century, Australia's average temperature is projected to increase by 3–5°C compared to a 1986–2005 baseline under the current global trajectory of greenhouse gas emissions, 1.5–2.5 °C for a medium emissions scenario or 0.5–1.5 °C for a low emissions scenario.
- There has been, and will continue to be, an increase in the number of days with weather conducive to fire in southern and eastern Australia. The number of days is projected to double by the end of the century under a high emissions scenario.
- May–July rainfall has reduced by around 19 per cent since 1970 in the southwest.
- Winter rainfall is projected to decrease across southern Australia, by a median of 17 per cent with a range of 2–32 per cent under a high emissions scenario by the end of the century, relative to 1986–2005, with more time spent in drought.
- Past and ongoing emissions commit us to further sea-level rise around Australia of around 6–19 cm by 2030, relative to the 1986–2005 baseline. By 2100, sea level rise could exceed two metres².
- The rise in mean sea level will amplify the effects of high tides and storm surges.

Intergovernmental Panel on Climate Change (IPCC): This is the international body for assessing the science related to climate change. IPCC assessments provide a scientific basis for governments at all levels to develop climate related policies, and they underlie negotiations at the UN Climate Conferences. IPCC reports undergo multiple rounds of drafting and review to ensure they are comprehensive and objective and produced in an open and transparent way. Thousands of other experts contribute to the reports by acting as reviewers, ensuring the reports reflect the full range of views in the scientific community.

Paris Agreement: The first-ever universal, legally binding global climate deal, adopted by 195 countries at the UNFCCC Conference of Parties in Paris, December 2015. It aims to respond to the global climate change threat by keeping a global temperature rise this century well below 2°C above pre-industrial levels and to pursue efforts to limit the temperature increase even further to 1.5°C. It aims for global greenhouse gases to peak as soon as possible, and seeks to foster resilience and climate adaptation. Full text of the Paris Agreement is available here. As of November 2017, all 195 countries have signed on to the Paris Agreement. The United States of America has indicated an intention to withdraw (it is unable to withdraw until November 2020). Further information tracking country ratifications and targets is available here.

Sustainable Development Goals (SDGs): In September 2015, 193 countries (including Australia) agreed to the United Nations 17 Sustainable Development Goals (SDGs) and 169 targets. The SDGs are a successor to the Millennium Development Goals, but unlike the Millennium Development Goals, relate to all developed and emerging countries, as well as developing countries. They aim to end poverty, hunger and inequality, take action on climate change and the environment, improve access to health and education, build strong institutions and partnerships, and more. Aims include climate action (Goal 13), affordable and clean energy (Goal 7), responsible consumption and production (Goal 12) and sustainable cities and communities (Goal 11). For further information on how the SDGs are relevant to Local Governments, see the Global Network of Cities, Local and Regional

Government (UCLG) publication "The Sustainable Development Goals: What Local governments need to know", available here.

United Nations Framework Convention on Climate Change (UNFCCC): an international environmental treaty adopted on 9 May 1992. The UNFCCC objective is to "stabilise greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system".

Disaster Recovery Funding Arrangements Western Australia (DRFAWA): provides a range of financial relief measures to assist communities to recover from an eligible natural disaster event, jointly funded by the Western Australian and Australian Governments, which reimburses Local Governments for the restoration and replacement of essential public assets owned by a local government to the extent necessary to restore the asset to the equivalent of its pre-disaster standard.

Western Australian Local Government action on climate change: WA Local Governments have, for a number of years, been actively engaged in a range of climate change mitigation and adaptation activity, together with education and encouraging awareness and behaviour change amongst residents. Many Local Governments have made voluntary commitments or pledges in relation to climate change, including the following:

Pledge	Description	Number of Local Government Participants
Local Government Climate Change Declaration	Developed by WALGA. A voluntary opportunity for Local Governments to demonstrate their political commitment to locally appropriate climate change adaptation and mitigation action. ³	40 (representing 65% of the WA population)
Divesting from fossil fuels	Commitment to shift money out of banks that fund fossil fuels. ⁴	12 (representing 30% of the WA population)
Compact of Mayors	A coalition of city leaders around the world committed to addressing climate change. ⁵	4
Cities Power Partnership	Launched July 2017 by the Climate Council, aims to celebrate and accelerate emission reductions and clean energy in Australian towns and cities. ⁶	17

In the past, Western Australian Local Governments have been key delivery agents of Commonwealth Government climate change mitigation programs, such as the Community Energy Efficiency Program (CEEP), the Local Government Energy Efficiency Program (LGEEP) and the Cities for Climate Protection (CCP) Program that was delivered by ICLEI with Commonwealth Government support. The LGEEP and CEEP grants assisted Local Governments in undertaking a wide range of building energy efficiency, LED public lighting and geothermal projects.

Program	Program dates	WA Local Government participants
Cities for Climate Protection	1999-2006	30
Local Government Energy Efficiency Program (LGEEP)	2011-2014	50 (includes 1 WALGA grant)
Community Energy Efficiency Program (CEEP)	2011-2016	15 (includes 1 WALGA grant)
Emissions Reduction Fund (ERF)	2014-present	2 (both transitioned from the Carbon Farming Initiative)

Adaptation is a current issue for Local Government, particularly as the effects of climate change are now unequivocally being felt, and Local Governments are in a position where they need to be planning for further effects of climate change in the future.

The Western Australian State Government provides around \$7 million funding per year under the overarching CoastWA banner (comprising CoastWest, the Coastal Management Plan Assistance Program and the Coastal Adaptation and Protection programs). In contrast, the New South Wales State Government (with a coastline one sixth the length of Western Australia), is providing \$63 million over five years. The Queensland State Government (with a coastline a little over half the length of Western Australia) provides \$12 million dollars over three years.

The Western Australian state planning system has encompassed coastal adaptation planning, but this has not yet been expanded to deal with other current and expected issues such as changes in temperature, rainfall and extreme weather events (including floods), heatwayes and bushfires.

Advocacy/Environment/Climate-Change.aspx.

⁴ For a list of Australian Local Governments that have committed to divest see here: http://gofossilfree.org.au/fossil-free-councils/. Not listed are City of Bayswater, City of Subiaco and the Shire of Mundaring, which have also recently committed to divest.

Warren Blackwood Alliance of Councils

Draft Subregional Climate Change Action Plan 2022-32

Acknowledgements

The Warren Blackwood Alliance of Councils (WBAC) acknowledges the Traditional Custodians of the land and seas of the region, and its pays respects to Elders past, present and emerging.

The WBAC acknowledges and appreciates the contribution of the Shire of Bridgetown-Greenbushes Sustainability Advisory Committee to the WBAC in advancing the climate action agenda in the region.

About this document

This draft Subregional Climate Change Action Plan has been developed to assist the Warren Blackwood Alliance of Councils (WBAC) to establish climate change actions that improve the resilience of their operations, and their communities, to the impacts of climate change, at the subregional scale.

Developed by the WBAC Climate Change Impact Reference Group (CCIRG), this draft Subregional Climate Change Action Plan is underpinned by a draft WBAC Climate Change Policy.

It is important to acknowledge that this WBAC Subregional Climate Change Policy and Action Plan are non-binding on member Councils. The actions outlined in the Subregional Climate Change Action Plan should align with the commitments that have been endorsed by the Councils as part of the WBAC Climate Change Policy. The identified actions should also be reflected in individual member Councils strategic documents and operating procedures, where applicable (e.g. Strategic Community Plan, Corporate Business Plan, Risk Management and Business Continuity Plans). Such reflections are the sole prerogative of the individual member Councils. A number of actions identified also directly relate to actions identified in the Warren Blackwood Sub-regional Growth Plan 2019ⁱ.

The Subregional Climate Change Action Plan focuses on identifying actions that the WBAC can pragmatically take to mitigate risks and impacts, reduce costs and adapt to the impacts of climate change on their operations, primarily at the subregional level. Many actions are also applicable, and have been identified as such, for potential implementation at the individual Shire level.

In providing this draft Subregional Climate Change Action Plan to the WBAC, the CCIRG is acutely aware that the individual Shires have varying levels of resource capacity and commitment, and that for many actions to be progressed, additional resources will be required, through direct funding, grant funding and collaborative partnerships with State and/or Commonwealth government agencies. Such resources will need to be deployed by the WBAC at the subregional level, and by individual member Councils, for local climate actions as determined by those individual member Councils.

Executive Summary

The impacts of climate change are already being felt by communities around the world, including increasing temperatures, longer droughts, more frequent and intensive natural disasters such as heatwaves and bushfires, and sea level rise, and associated increases in coastal erosion and inundation. With these impacts projected to further increase over the coming years and decades, the Warren Blackwood Alliance of Councils needs to take action now to safeguard the future.

The risks associated with climate change are becoming more important to Local Governments, and the need for Local Governments to respond to, and manage the impacts of climate change has never been greater. With Local Governments on the front line of addressing climate change, the WBAC has an important role to play. To establish our support for pragmatic climate change action, the WBAC has committed to a Subregional Climate Change Policy and Action Plan.

The WBAC recognises that climate change will continue to have a significant effect on the Western Australian environment, community and economy. Accordingly, we have committed to continue addressing climate change at the subregional level and within our member Local Government areas to minimise these impacts.

The WBAC acknowledges the importance of taking action, and as such is committed to continue finding practical and affordable ways to address climate change risks and impacts within the Warren Blackwood subregion. Underpinned and informed by the work of our CCIRG, we have developed this draft Subregional Climate Change Action Plan, which brings together 11 adaptation, 9 mitigation, 14 leadership and advocacy, and 7 communication actions that we need to undertake in order to help tackle climate change, build resilience and minimise the vulnerability of our communities to climate change.

Our overall objective is to act to mitigate, and adapt to, climate change and therefore sustain the social, environmental and economic qualities which are intrinsic to the character of our region.

Acting on and responding to climate change is an ongoing process, and this Subregional Climate Change Action Plan will be need to be reviewed and updated every three years to reflect changing political, legislative and resourcing circumstances, and emerging scientific information.

Context

Climate science

International scientific consensus is that climate change is occurring, and it is driven by anthropogenic (human) causes, with human activities having a profound impact on the concentration of greenhouse gas emissions since the start of the industrial revolution. Ultimately, these activities, such as the burning of fossil fuels, land clearing and agriculture, have increased greenhouse gas concentrations in the atmosphere, leading to changes in the climate system over a relatively short period of time.

The Intergovernmental Panel on Climate Change (IPCC) is an international body responsible for assessing the science related to climate change. IPCC assessments provide a scientific basis for governments at all levels to develop climate related policies, and they are fundamental inputs to negotiations at the United Nations Climate Conferences and the negotiation of international climate agreements. The IPCCs Fifth Assessment Report, found that:

"Warming of the climate system is unequivocal, and since the 1950s, many of the observed changes are unprecedented over decades to millennia. The atmosphere and ocean have warmed, the amounts of snow and ice have diminished, sea level has risen, and the concentrations of greenhouse gases have increased"."

Most aspects of climate change will persist for many centuries even if emissions of CO₂ are stopped."ⁱⁱⁱ

The IPCC has also found:

"It is extremely likely [95–100%] that human influence has been the dominant cause of the observed warming since the mid-20th century."

Climate scenarios

In order to make projections of future climate change, the scientific community has developed climate models, using advanced computer simulations, for a range of different greenhouse gas emissions scenarios (i.e. projections of what the global greenhouse emissions may be in future years). These scenarios are used to inform policy and decision makers to plan for the future.

In the Fifth IPCC Assessment, a set of four possible scenarios, also known as Representative Concentration Pathways (RCPs), were proposed. These RCPs represent possible pathways based on global atmospheric greenhouse gas emissions concentrations and predict how concentrations of greenhouse gases in the atmosphere will impact the climate.

 Very low emissions scenario – based on the IPCC's RCP2.6. Under this scenario, significant collaborative effort will be made to drive decarbonisation and lower emissions, which will result in a temperature

increase of 1°C, a 0.4m sea level rise and a minor increase in extreme weather events (by 2081-2100, relative to 1986-2005).

- Low emissions scenario based on the IPCC's RCP4.5. Under this scenario, collaborative efforts will be made to drive decarbonisation and lower emissions, which will result in a temperature increase of 1.8°C, a 0.47m sea level rise and a moderate increase in extreme weather events (by 2081-2100, relative to 1986-2005).
- High emissions scenario based on the IPCC's RCP6.0. Under this scenario, minimal efforts will be made to drive decarbonisation and lower emissions, which will result in a temperature increase of 2.2°C, a 0.48m sea level rise and a moderate increase in extreme weather events (by 2081-2100, relative to 1986-2005).
- Very high emissions scenario based on the IPCC's RCP8.5. Under this scenario, very low efforts will be made to drive decarbonisation and lower emissions, which will result in a temperature increase of 3.7°C, a 0.63m sea level rise and a large increase in extreme weather events (by 2081-2100, relative to 1986-2005).

Projected climatic changes

In the 20th century the impacts of climate change have become increasingly visible, with observed impacts including increases in global average air and ocean temperatures, rising global sea level, long-term sustained widespread reduction of snow and ice cover, and changes in atmospheric and ocean circulation and regional weather patterns, which influence seasonal rainfall conditions.

These changes threaten both human and natural systems, both directly and also through increased extreme weather events, such as heat waves, cyclones and other natural disasters, coastal inundation due to sea level rise, and disruptions to rainfall patterns.

In Australia, the 2018 Bureau of Meteorology State of the Climate Report (CSIRO and Australian Government Bureau of Meteorology 2018) noted that Australia has experienced increases to sea and air temperatures, sea level rises and ocean acidification, along with observed declines in rainfall amounts in the southwest and southeast of Australia.

Australia is the driest inhabited continent on earth, and even in the absence on climate change is characterised by variability and extremes. With the impacts of climate change projected to place additional stress on our natural and human systems, there is an urgent need to address climate change.

For the South West of Western Australia, projected changes to our climate in the future include:

- Further increase in temperatures, with more extremely hot days and fewer extremely cool days;
- More heat waves that will be longer and hotter;

- More frequent, extensive, intensive and longer-lasting marine heatwaves;
- Ongoing sea level rise;
- Further warming and acidification of the oceans;
- A decrease in cool-season rainfall across southern Australia, including the southwest of WA;
- More frequent, longer and more intense droughts across southern Australia, including the southwest of WA;
- More intense heavy rainfall throughout Australia, particularly for shortduration extreme rainfall events (storms);
- An increase in the number of high fire weather danger days and a longer fire season for south western Australia; and
- Through a combination of many of these impacts, changes to biodiversity including increased probability of species extinction.

These changes will have impacts on the region's environment, infrastructure and assets, and communities' health and well-being.

Role of Government

As a signatory to the Paris Agreement under the United Nations Framework Convention on Climate Change and the United Nations Sustainable Development Goals (SDGs), Australia has committed to taking action on climate change and to ensuring that mitigation and adaptation action is equitable and consistent with the aims of the SDGs. The Paris Agreement expressly recognises the importance of engagement at all levels of government. As such, the management of climate-change risks is spread across the three tiers of government: Commonwealth, State and Territory and Local.

In 2012, the Councils of Australian Governments (COAG) formally agreed on the roles and responsibilities for climate-change adaptation in Australia.

The Commonwealth Government is responsible for:

- Managing climate change science and national adaptation research to allow Australia to effectively adapt to the impacts of climate change;
- Providing leadership on national adaptation reform, and collaborating with States and Territories in setting and implementing national priorities and regional priorities;
- Managing climate change risks and impacts across the Commonwealth's portfolio of assets and programs; and
- Maintaining a strong, flexible economy and social safety net that will help Australia adapt to climate change impacts by ensuring resources are available to respond to climate change and can be deployed efficiently.

The State Government is responsible for:

- Providing local and regional science and information;
- Managing climate change risks and impacts across State assets and programs;

- Working with the Commonwealth to implement the national adaptation reform: and
- Encouraging climate resilience and adaptive capacity.

In 2020, the Western Australian State Government released its Climate Policy^{vi}, which has several actions directly related to Local Government, viz:

- Western Australian Regional Climate Alliance Support regional local governments to drive action on climate change, energy and sustainability through regional partnerships.
- Climate Resilience Action Plan 2022–25 Develop a coordinated, collaborative plan to support Western Australian industries, cities and regions to identify and manage climate impacts and enhance climate resilience.
- Coastward Implement a coastal adaptation program to deliver a strategic response to the recommendations of the Assessment of Coastal Erosion Hotspots report, including grants to support local governments to undertake coastal management for the public benefit.

Coastal Adaptation and Protection Fund - Invest in adaptation and interim protection works for high-priority coastal erosion hotspots. There are numerous other State Government actions from its Climate Policy that will have a direct and substantial impact on the WBAC Sub-regional Growth Plan 2019, and this Subregional Climate Change Action Plan. It is imperative that a review of the WBAC Sub-regional Growth Plan is undertaken, in collaboration with key stakeholders, in order to give full consideration to the State Government proposed activities as outlined in its Climate Policy on said Sub-regional Growth Plan.

Local Governments are on the frontline in addressing climate change impacts and have a critical role to play in ensuring that mitigation and adaptation responses are suitably tailored to the specific risks in our area, and that local communities and stakeholders are consulted and involved in these efforts.

As small regional local governments with commensurately small rate bases, there is a significant resource deficit reality that will need to be addressed. The WBAC subregional approach is a pragmatic reflection of the economies of scale and collaborative opportunities that can be realised through a collective approach by low resourced Shires

Local Governments are responsible for:

- Administering relevant state and territory and/or Commonwealth legislation to promote adaptation as required including the application of relevant codes;
- Managing risks and impacts to public assets owned and managed by Local Governments:
- Managing risks and impacts to Local Government service delivery;
- Collaborating across Local Governments and with State and Territory Governments to manage risks of regional climate change impacts;
- Ensuring policies and regulations under their jurisdiction, including local planning and development regulations, incorporate climate change

- considerations and are consistent with State and Commonwealth Government adaptation approaches;
- Facilitating building resilience and adaptive capacity in the local community, including through providing information about relevant climate change risks;
- Working in partnership with the community, locally based and relevant NGOs, business and other key stakeholders to manage the risks and impacts associated with climate change; and
- Contributing appropriate resources to prepare, prevent, respond and recover from detrimental climatic impacts.

Adaptation and Mitigation

The impacts of climate change will impact the WBAC sub-region in a variety of ways. These impacts are predicted to increase in severity and frequency in the future, which will pose increasing risks to our community, environment, assets and infrastructure. In order to respond to these impacts there are two main categories of climate change response: adaptation and mitigation, both of which are essential, and equally as important in addressing climate change.

- 1. Climate change mitigation involves actions that are intended to reduce our greenhouse gas emissions to minimise the severity of climate change or enhance the sinks for these emissions. For example, mitigation actions may include switching to renewable forms of energy such as wind and solar, and implementing energy efficiency initiatives, and supporting emission sinks such as investing in revegetation and or modified landscape management (e.g. fire management) to improve carbon capture.
- 2. Climate change adaptation consists of actions undertaken to reduce the consequences of the physical impacts of climate change, as well as to harness any opportunities as a result of these actions. Through adaptation actions we will become more prepared and able to adapt to the impacts of climate change, reducing our vulnerability. For example, adaptation actions may include building seawalls to protect infrastructure from erosion, raising the height of houses in flood prone areas, or behaviour change initiatives, such as monitoring vulnerable segments of the community during heatwayes.

Mitigation involves avoiding and reducing the causes of climate changes (greenhouse gas emissions), whereas adaptation addresses the impacts of climate change and associated risks and how we respond to them. For effective global mitigation it is important for everyone in the community, all businesses, and all levels of government to contribute to reducing emissions. Therefore, an effective climate change response requires both adaptation and mitigation actions to build the resilience of our subregion to the impacts of climate change and help avoid worst case climate change scenarios.

For the WBAC, this also requires a commitment to communication and political leadership and advocacy to ensure the required collaboration and resources can be acquired to ensure the timely delivery of robust, pragmatic adaptation and mitigation action.

This plan outlines the Warren Blackwood Alliance of Councils Climate Change Policy commitments, and the relevant adaptation, mitigation, leadership and advocacy, and communication advocacy actions that we have committed to at both the subregional and organisational levels.

Advocacy and Leadership

This Climate Change Action Plan captures and highlights the opportunities and actions across the region that will help the Shires of the region respond to the impacts of climate change. However, not all adaptation and/or mitigation actions can be organised or implemented at a WBAC subregional level. Some responsibilities, authority and resourcing capacities sit at the State or Commonwealth levels.

In these circumstances, political advocacy by Shire Presidents and elected members will be critical to influence and lead action

Engagement with local politicians, relevant State Ministers and Directors General to socialise the subregional climate change action agenda will be essential in the acquisition of the required human and financial resources for a significant number of the identified actions in the Climate Change Action Plan.

Existing avenues for advocacy already exist through elected member and senior officer participation in relevant state agencies engagement processes (e.g. representation on the South West Development Commission), and the existing WALGA governance structures (South West Country Zone of WALGA). These constructs should be should be maximised. Aside from direct Commonwealth Ministerial engagement, the opportunity to engage via the Australian Local Government Association - though submitting motions to the annual ALGA National General Assembly - also should not be discounted when advocacy to the Commonwealth Government is required.

Communication

Communication is an important component of climate change action planning, to ensure that both the WBAC and its Shires are able to reach their desired respective audiences to obtain support for climate change adaption or mitigation action, and to share its successes and challenges.

Local Governments may integrate communications relating to their climate actions within existing communication programs, or determine that significantly new communication efforts are required.

Local Governments should consider both internal (i.e. within their operations) and external (i.e. outside of their operations) communication methods. Local Governments should ensure that communications do not discriminate and are accessible for the whole community.

It is important for the WBAC to communicate what we are doing in relation to climate change to our communities and stakeholders, to obtain support for our actions, and to share our successes and challenges.

WBAC Shires have already integrated a number of aspects relating to climate change within their Strategic Community Plans, Corporate Business Plans and operational plans. It is important that key stakeholder engagement and messaging is conducted in a consistent manner across the region.

The WBAC acknowledges that member Shires are best placed for local community engagement.

The WBAC climate action communication plan comprises both internal and external aspects.

The WBAC will:

- Share resources on our adaptation and mitigation actions
- · Provide updates at member Councils' meetings
- Include communications within internal newsletters
- Communicate what we are doing through our websites
- · Share good news stories in our local media outlets
- Establish an external working group of key stakeholders and community leaders

Stakeholder Engagement

Stakeholder engagement ensures that the needs of all stakeholders, both internal and external, are considered in organisational goal setting and strategy development. As such, the WBAC believes that effective consultation is critical to the success of climate adaptation and mitigation. Therefore, in order to evaluate the effectiveness and understand the viability of the WBAC response to climate change, the WBAC engages with both member Shires and external stakeholders.

Obtaining stakeholder input and understanding stakeholder views on our climate change response will also help us to more effectively design and embed actions within the WBAC Subregional Climate Change Action Plan. We will also use stakeholder engagement as part of our monitoring process to assess the effectiveness of our actions. We will conduct the following stakeholder engagement activities:

 As part of updating a Shire Strategic Community Plan, conduct a survey of communities to gain insights on the perceptions of our climate change challenges, and our climate change mitigation and adaptation actions.

- Consult with elected members of our member Shires. Obtain individual Shire Council sign off on our draft Subregional Climate Change Policy, and Action Plan.
- Establish a climate change stakeholder working group with key stakeholders and the community, to assist the CCIRG in its deliberations.
- Engage with other Local Governments within the South West region to share learnings and progress regional actions.
- Engage with WALGA and other organisations to remain informed, and to contribute to, discussions on climate change management at the Local Government level.

Approach to Climate Change

In 2021 the WBAC committed to a Subregional Climate Change Policy and Action Plan. As part of this, we have committed to:

- Develop and implement a Subregional Climate Change Action Plan (this Plan).
- Encourage and empower the local community and local businesses to reduce their greenhouse gas emissions and to adapt to the impacts of climate change.
- Support WALGA to work with State and Federal Government to ensure achievement of greenhouse gas emissions reduction targets as set out in key National and International agreements.
- Support WALGA to work with State and Federal Government to implement key actions and activities for climate change management at a local level.
- Work with key stakeholders within region, where relevant, to ensure achievement of the actions set out in our Climate Change Action Plan.
- Assess the locally specific risks associated with climate change and implications for our services, and identify areas where appropriate mitigation and/or adaptation strategies should be further developed and implemented.
- Ensure that, at appropriate review intervals, our Subregional Climate Change Policy and Action Plan, as well as individual Shire Corporate Business Plan and Strategic Community Plans/policies/strategies are reviewed and amended to incorporate the latest climate science, and to reflect the subregional climate change management priorities.
- Monitor the progress of the WBAC Climate Change Action Plan adaptation and mitigation actions and communicate our achievements to the both the member Councils and their Communities.

In order to respond to the impacts of climate change, the WBAC and its members have already taken action including, but not exclusive to:-

Retrofitting of local government buildings with energy efficient technologies.
 (Shire of Boyup Brook, Shire of Bridgetown-Greenbushes, Shire of Donnybrook-Balingup, Shire of Manjimup, Shire of Nannup)

- Bulk procurement of 100% renewable energy for contestable Shire sites (Shire of Boyup Brook, Shire of Bridgetown-Greenbushes, Shire of Donnybrook-Balingup, Shire of Manjimup)
- Solar PV Implementation Plan (Shire of Bridgetown-Greenbushes, Shire of Manjimup)
- Developing a Climate Change Action Plan (Shire of Bridgetown-Greenbushes)
- Retrofitting streetlights with energy efficient streetlighting (Shire of Donnybrook-Balingup, Shire of Manjimup)
- Joined the Cities Power Partnership (Shire of Donnybrook-Balingup)
- Retrofitting parks and gardens with water efficient plants and/or irrigation systems
 (Shire of Boyup Brook, Shire of Bridgetown-Greenbushes, Shire of Donnybrook-Balingup, Shire of Manjimup, Shire of Nannup)
- Being a Water Corporation certified Waterwise Council (Shire of Bridgetown-Greenbushes)

The WBAC are committed to taking further action at both the subregional and local level to mitigate against, and adapt to, climate change, and hence have developed this Subregional Climate Change Action Plan.

We use the following principles to assist our subregional climate change action planning:

- Pragmatic Our goals and actions work towards a pragmatic vision.
- Inclusive We involve multiple Shires, stakeholders and communities in planning and implementation.
- Fair We seek solutions that equitably address the risks of climate change and share the costs and benefits of action across the WBAC Shires.
- Comprehensive and integrated We aim to coherently undertake actions across a range of sectors within the WBAC, as well as supporting broader regional and initiatives, and the realisation of priorities of higher levels of government, when possible and appropriate.
- Relevant Our actions seek to deliver local benefits and support local social, economic and environmental priorities.
- Actionable We propose cost-effective actions that can realistically be implemented.
- Evidence-based Our action planning reflects both scientific knowledge and local understanding.

Climate Risk Assessment Process

As part of our action planning process, we conducted a qualitative Shire level climate change risk assessment, which allowed us to identify the aspects of our operations most at risk to the physical and transitional impacts of climate change. This enabled us to prioritise management of these at risk areas through the development of our current and future Shire actions.

It is recommended that a more detailed risk assessment process be conducted in line with the ISO 31000:2018 Risk Management.

The key steps in the risk assessment process should be:

- Preparing for the risk assessment by gaining agreement on the purpose of the assessment, collating the data and information that we required, identifying the resources needed, and forming the project team and developing a schedule.
- Defining the scope, and developing an understanding of the external and internal context of the risk assessment. This included identifying our objectives and responsibilities, and reflecting on the demographic, socioeconomic and environmental context in which we operate.
- Identifying the risks that we will be exposed to as a result of climatic changes, and the shift to a low carbon world.
- Evaluating the consequence and likelihood of each risk, and identifying the controls that we currently have in place to manage these risks.
- Following this process, a combination of the consequence and likelihood ratings can generate inherent risk scores, and then be assessed how well existing controls are managing these risks, to determine the residual risk.
- This should include a workshop with key Shire internal stakeholders to validate our risks, agree on consequence and likelihood ratings, identify existing controls for each risk and their effectiveness, and determine residual risk ratings.
- Using the residual risk scores, Shires will be able to prioritise risks and use this information to inform the setting of future actions.

Risks and Opportunities

We recognise that climate change presents various significant challenges, risks and opportunities to the WBAC Shires.

Changes to our climate will present risks across many aspects of our subregion including

- Damage to, or loss of, properties building and infrastructure
- Reduced community liveability

- Damage to, or loss of, biodiversity and natural habitat
- Increased heat, pest and water stress on vegetation
- Increased demand for water and electricity services
- Increased risks to public health or loss of life (e.g. through disease outbreaks exacerbated by higher temperatures)
- · Reduced public safety and/or wellbeing
- Increased number of higher bushfire risk days, and severe bushfires
- Damage to, or loss of biodiversity and natural habitat, as a result of coastal inundation and/or salt intrusion
- Damage to, or loss of coastal and low-lying buildings, infrastructure and land, as a result of coastal inundation
- Potential public displacement resulting from residents being forced to flee certain areas as a result of climatic changes
- Increased insurance premiums
- Increased maintenance of road and drainage networks
- Decreased environmental water quality
- Decreased water security
- Increased demand on emergency response and management services
- Impacts on food resources and food production industries due to reduced agricultural outputs from reduced rainfall and damage to agricultural lands

While the risks of climate change have the potential to have severe impact on our subregion, managing these risks also creates opportunities for the WBAC to improve the resilience of both its communities and respective Shire operations.

Broadly, effective adaptation and mitigation actions will assist to minimise disruptions and costs of climate change physical impacts. Subject to business cases, this may represent a good investment for the Local Government. Taking action to address climate change can also have positive social, environmental and economic impacts. For example, improving liveability, social inclusion, health and wellbeing, and our emergency preparedness, and supporting economic growth of both the sub-regional and local economies.

Evaluation and Prioritisation of Actions

To select climate change actions that will bring about the greatest improvements in the resilience of WBAC activities, while being pragmatic and achievable for our subregion, we undertook a first-pass assessment of a long list of adaptation and mitigation actions against a number of criteria, which enabled us to prioritise those that can realistically be achieved over the life of the Action Plan (2022-2032).

The following criteria were used as part of the assessment process:

Ability to manage climate risks

- Scale of investment needed
- Scale of potential emission reductions
- Ability to facilitate/leverage State and Commonwealth investment
- Equity implications (benefits and costs to various stakeholders)
- Complexity
- Human resources available to implement action
- Level of funding required to implement action
- Timeframe for implementation

Each action was assessed against the criteria and assigned a draft score of either Low, Medium or High. Where it was identified that one or multiple Shires have the resources available to execute a particular action, and that the action will result in our desired outcomes, these were selected for inclusion in the WBAC Sub-region Climate Change Action Plan.

Monitoring and Review

Having a formal, periodic process in place for monitoring and evaluating our Subregional Climate Change Action Plan is fundamental to understanding our progress in addressing climate change, and the effectiveness of our actions, and will assist us in guiding future decisions. Monitoring and evaluation of our Subregional Climate Change Action Plan will also generate learning and idea creation opportunities in relation to climate change which will help to improve the design and delivery of future climate change related policies, plans and activities. It is our aim that, through this ongoing monitoring and evaluation process, we will embed climate change adaptation considerations into our business as usual processes.

We will use indicators to understand how we are tracking in relation to implementing our adaptation actions. For each action we have identified indicators that we can measure to track performance and understand whether the desired outcomes are being achieved.

This Subregional Climate Change Action Plan will be monitored on an annual basis, in order to report to member Shires, and make recommendations to respective annual budgets, as required.

The outcomes of the annual review will be used to identify key challenges and focus areas for the following years based on actions that are not on track for completion within their timeframe, and actions that have not resulted in the achievement of the intended outcomes.

Following the annual monitoring process, we will evaluate our Subregional Climate Change Action Plan and identify whether any areas require updates, or additional funding/focus in order for the outcomes to be achieved. Any substantive changes made will be communicated through the respective Shires and to our community where relevant.

Reporting

The outputs of the three yearly review process will be documented in a WBAC report to the Shire Councils, showing progress against each action. Where changes are required to the Subregional Climate Change Action Plan as a result of the annual report, these will be submitted to individual WBAC Shire Councils for approval.

The outcomes of the full review process in 2026 will generate a revised version of the Subregional Climate Change Action Plan, which will be submitted to WBAC members for Council approval, before being adopted.

Major updates and achievements will be publicly communicated to our residents, businesses, and the wider community such as through online media communications, and within our annual reporting requirements.

Actions

On the following table, the WBAC has initially identified these climate change related actions as current priorities:-

Category	Adaptation Action	Opportunity for Stakeholder Engagement	Priority	Targeted completion date
A1	Develop and implement a subregional waste strategy, including an assessment for localised industry hubs for priority recycled materials and green waste (GO/FOGO) and the development of a business case for value adding waste streams.	WBAC / Shires	I	2032
A2	Support the development of alternate, economically sustainable energy opportunities to improve local resilience and decrease reliance on the South West Interconnected Grid. *	WBAC / Shires / Western Power	Σ	2025
A3	Evaluate and facilitate mini grids/embedded networks/grid connected solar panels/hybrid grids embedded in the community to reduce emissions from electricity consumption.	WBAC / Shires / Western Power	M	2025
A 4	Advocate to the State Government to provide the Shires with the necessary tools and knowledge to enable a Public Health Plan, or similar, to be developed to respond to the challenges that climate change will have on public health and wellbeing. Assess the implications of the findings of the Climate Health Inquiry.	WBAC / Shires / DoH	M	2027
A5	Advocate to relevant agencies for more specific flood modelling and water balancing, and collaborate with DWER and DBCA on developing Streamflow Management Plans for stressed waterways in the region.	WBAC / Shires / DBCA / DWER / BoM	M	2025
A6	Develop a business case for a subregional bulk streetlight replacement program with Western Power.	WBAC	M	2023
A7	Attain and ensure subregional climate data informs Shire Strategic Community, Corporate Business, Risk Management and Business Continuity Plans.	Shires	M	2032
A8	Develop and implement a Stakeholder engagement process to obtain input from the wider community on climate change adaptation planning.	Shires	Σ	2023-25

Category	Adaptation Action (Con't)	Opportunity for Stakeholder Engagement	Priority	Targeted completion date
6 V	Revise Regional Tourism Strategy, or similar, which considers how climate change will impacts tourism, and identifies tourism areas that are likely to be resilient in the long term (<i>The Future of Tourism: Southern Forests and Valleys Region</i> , Warren Blackwood Alliance of Councils, 2017; <i>State Government Strategy for Tourism in Western Australia</i> 2020, Tourism Western Australia, 2010).	WBAC	Σ	2025
A10	Work with Water Corporation and DWER to evaluate technology options for potable water security for Windy Harbour, Northcliffe and other 'at risk' communities.	Shire/s / Water Corporation / DWER	Σ	2025
A11	Shires to review eligibility criteria for community grants to include community climate change measures.	Shires	Σ	2022

Category	Mitigation Action	Opportunity for Stakeholder Engagement	Priority	Targeted completion date
M1	Continue to provide support to the Chief Fire Control Officer and Volunteer Bush Fire Brigades. *	Shires	工	Ongoing
M2	Continue to partner with DFES, DBCA and FPC on Bushfire mitigation. *	Shires	I	Ongoing
M3	Ensure Shire bushfire management planning and actions considers future regional climate change impacts.	WBAC / DFES / DBCA / FPC	I	2024
M4	Procure a WBAC wide energy audit of local government facilities, to enable targeting of high emission/high cost operations.	WBAC / Shires	Σ	2023
M5	Undertake a regional kerbside waste minimisation strategy, including community education. Consider using the WALGA Bin-tagging program.	Shires / WALGA	M	2022-23
M6	Ensure all Community events are Wastewise events – apply for grant funding from the Waste Authority.	Shires / Waste Authority	Σ	2022
M7	Investigate a subregional wide urban forest / street tree strategy to reduce heat island effects in regional towns.	WBAC / Shires	Σ	2022+
M8	Undertake a subregional wide assessment of urban stormwater harvesting/WSUD/ hydrozoning and other water efficiency opportunities to reduce potable use and improve overall water security. Join the Water Corporation Waterwise Councils Program	Shires	Σ	2023
6W	Offset Shire vehicle emissions through participating in Greenfleet, or similar accredited offset program.	Shires	M	2023

Category	Leadership and Advocacy	Opportunity for Stakeholder Engagement	Priority	Targeted completion date
L1	Support knowledge partnerships to assist Local Government through recovery processes after large emergency events. *	Shires	Ι	Ongoing
L2	Review the WBAC Subregional Growth Plan 2019 in light of the release of the State Climate Policy (2020) and amend actions accordingly.	WBAC	工	2023
L3	Resource a dedicated WBAC officer to advance action items in the final Subregional Climate Change Action Plan.	WBAC	I	2023
L4	Brief key stakeholder groups and relevant State Government agencies on the draft Subregional Climate Change Action Plan.	WBAC	I	2024
L5	Advocate to the Minister for Environment, Minister for Primary Industries and Regional Development and the Minister for Planning and Heritage for the continuation of the State Government Climate Policy Regional Climate Alliance, CoastWA, and the Coastal Adaptation and Protection Fund, and for the inclusion of State Climate Policy actions in all Development Commission Investment Plans. Inform the Minister for Local Government.	WBAC / SWCZ / WALGA	н	2022/2023
P.	Advocate to the State Government and relevant agencies to continue to improve emergency warning systems.	WBAC / Shires / SWCZ / WALGA / DFES	Ι	Ongoing
L7	Support programs, activities and initiatives which encourage strategic alliances, cooperative approaches and shared resources to optimise outcomes. *	WBAC / Shires	I	Ongoing
R9	Advocate for a review of regional strategic planning documents are reviewed to ensure they reflect subregional and State Government climate initiatives (South West Strategic Plan 2021-2023, South West Development Commission, 2021; South West Regional Blueprint, Regional Development Australia South West and South West Development Commission, December 2014).	WBAC / SWDC / RDASW	Ι	2022

F3	Advocate for a state planning policy, with the inclusion of measures to reduce carbon emissions of new buildings and infrastructure.	WBAC	Σ	2023-25
L10	Advocate to the State Government and other relevant agencies for stronger planning and infrastructure guidelines that account for climate change impacts.	WBAC / SWCZ / WALGA / DPLH	Σ	2025
L11	Ensure Shire policies and regulations, including local planning and development regulations, incorporate climate change considerations and are consistent with State and Commonwealth Government adaptation and mitigation approaches.	Shires	I	Ongoing
L12	Advocate to relevant State and Commonwealth Government agencies for residential/industry rebates and incentives to assist energy and water efficiency and in the transition to renewable energy.	WBAC / DWER		2025
L13	Support WALGA's advocacy efforts to improve adoption of energy efficient lighting in streetlights.	WBAC / Shires		2022+
L14	Establish a climate change stakeholder working group with key stakeholders and the community, to assist the WBAC in its deliberations.	WBAC	Σ	2023

Category	Communication	Opportunity for Stakeholder Engagement	Priority	Targeted completion date
2	Develop a subregional Climate Change Communication and Engagement Plan. Consider using the International Association for Public Participation (IAP2) methodologies.	WBAC / Shires	工	2023
C2	Undertake stakeholder engagement to inform the wider community on climate change adaptation and mitigation action.	WBAC / Shires	N	2022+
C3	Support and promote environmental education and awareness in the subregion. *	Shires	M	2022+
O 4	Consider joining the Climate Council Cities Power Partnership to enable access to contemporary Local Government climate change resources, projects and information.	Shires	M	2022
C5	Consider signing the WALGA Climate Change Declaration, already signed by 40 Local Governments representing 65% of the State population.	Shires	M	2022
90	Engage with other Local Governments within the South West region to share learnings and progress regional actions.	Shires	I	2022+
C7	Engage with WALGA and other organisations to remain informed, and to contribute to, discussions on climate change management at the Local Government level.	Shires	Σ	2022+

* Denotes action from the WBAC Subregional Growth Plan 2019 Note:

Glossary

Climate

The composite of surface weather conditions such as temperature, rainfall, atmospheric pressure, humidity, sunshine and winds, averaged over a period of time ranging from months to thousands of years.

Climate change

Any change in climate over time, whether due to natural variability or as a result of human activity.

Climate change mitigation

Climate change mitigation consists of actions to limit the magnitude or rate of long-term climate change. Climate change mitigation generally involves reductions in human emissions of greenhouse gases.

Climate change adaptation

Climate change adaptation is a response to global warming and climate change, that seeks to reduce the vulnerability of social and biological systems to relatively sudden change and thus offset the effects of global warming.

Adaptive capacity

The capacity of an organisation or system to moderate the risks of climate change, or to realise benefits, through changes in its characteristics or behaviour.

Climate projection

A projection of the response of the climate system to scenarios of greenhouse gas emissions or atmospheric concentrations of greenhouse gases. Climate projections are often based upon simulations of the climate system by computer based mathematical models. Climate projections depend on assumptions about emission rates and concentrations and response of the climate system to changes in these variables and can therefore be distinguished from climate predictions.

Climate scenario

A coherent, plausible but often simplified description of a possible future state of the climate. A climate scenario should not be viewed as a prediction of the future climate. Rather, it provides a means of understanding the potential impacts of climate change, and identifying the potential risks and opportunities created by an uncertain future climate.

Climate variability

Variations or deviations from the mean state of the climate. The climate system has natural, internal variability but variability could be affected by external factors driving climate change such as changes in the atmospheric concentration of greenhouse gases.

Enhanced greenhouse effect

Increases in the atmospheric concentration of greenhouse gases such as carbon dioxide, methane and nitrous oxide due to human activities, leading to an increase in the amount of thermal radiation near the Earth's surface.

Extreme event

Weather conditions that are rare for a particular place and/or time such as an intense storm or heat wave.

Global warming

An increase in the global average surface temperature due to natural or human caused factors.

Greenhouse gases

A greenhouse gas (GHG) is a gas in an atmosphere that absorbs and emits radiation within the thermal infrared range. This process is the fundamental cause of the greenhouse effect.

Greenhouse effect

The process where gases in the lower atmosphere such as carbon dioxide and water vapour trap radiation released by the Earth's surface after it has been warmed by solar energy. These gases then radiate heat back towards the ground, adding to the heat the ground receives from the Sun.

Net zero emissions

Carbon neutrality, or having a net zero carbon footprint, refers to achieving net zero carbon emissions by balancing a measured amount of carbon released with an equivalent amount sequestered or offset, or buying enough carbon credits to make up the difference.

Offsets

A carbon offset (or carbon credit) is generated from an activity that prevents, reduces or removes greenhouse gas emissions from being released into the atmosphere to compensate for emissions occurring elsewhere.

Renewable energy

Renewable energy is energy that is collected from renewable resources that are naturally replenished on a human timescale, such as sunlight, wind, rain, tides, waves, and geothermal heat.

Resilience

The capacity of individuals, institutions, businesses and systems to adapt to chronic stresses and acute shocks.

Sensitivity

The degree to which a system is affected, either adversely or beneficially, by climate related variables including means, extremes and variability.

Urban heat island effect

Refers to when an urban area is significantly warmer than its surrounding rural areas due to human activities. The main cause of the urban heat island effect is from the modification of land surfaces.

Vulnerability

The extent to which a system or organisation can cope with the negative impacts of climate change, variability and extremes. It is a function of risk and adaptive capacity.

1. Introduction

7 (seven) agricultural properties are bisected by the Shire of Donnybrook Balingup and Shire of Boyup Brook district boundary.

In accordance with clause 2(1)(c) of Schedule 2.1 of the Local Government Act 1995 (The Act), the Shire of Donnybrook Balingup and Shire of Boyup Brook (The Shires) submit this joint proposal to the Local Government Advisory Board (The Board) to adjust the district boundary around these lots.

It is requested that The Board considers this proposal to be of a minor nature in accordance with Clause 3(3) of Schedule 2.1 of The Act due to.

- a) Minor number of properties and population subject to the proposal
- b) Support for the proposal by both Local Governments
- c) Six-week landowner submission period undertaken
- d) No objections received by landowners
- e) Minor net transfer of land area
- f) No adverse financial impact or consequences identified by either Local Government
- g) The proposal is a correction to boundary anomalies

MINUTES

Rylington Park Committee Meeting was held in the Shire Chambers at 6.00 pm, Thursday 12 May 2022

Attendance

Cr R Walker – Shire President
Cr O'Connell – Deputy Shire President
Cr C Caldwell
Cr Kevin Moir
Cr Darren King
Mr Joshua Stretch
Mr Dale Putland
Mrs Carolyn Mallett
Mrs Maria Lane
Mr Marc Deas
Mrs Erlanda Deas

Observer

Cr Adrian Price Cr Philippe Kaltenrieder

Apologies

Mr James Johnston Mr Tristan Mead

Order of business:

1. Marc and Erlanda Deas presented information on farm activities as below:

Rylington Park - 10 May 2022

Sheep

- Feeding sheep grain and hay.
- Preg scanned ewes mated to merino rams: scanning rate is 133% to mated numbers. We have 5.3% dries.
- 48 merino wethers (tail-end) sold @ \$88 average
- 174 dry ewes sold to V&V Walsh \$144.27 average plus \$4 per skin
- 34 wool bales picked up not in Perth yet
- Matt Chambers picked up all oddments this week.

• Ear tags ordered – merino ewe lambs will get EID tags

Cropping

- Raked and burned stubbles
- Got paddocks ready for seeding
- Barley seed was cleaned however contains too much spear grass seed. Have sourced clean seed.
- Gran NS was spread on cropping paddocks.
- Sprayed 1st knockdown
- Made new trunks for 5-in-1 bin
- Pasture reseeding done. Started seeding canola on Wednesday.
- 2 shire workers help cutting up fallen trees and cleaning paddocks
- Boyup Ag Supplies have started preparing both their sites for their trials. Other trials will be Summit Fertiliser and the Ag department.

Schools / Events

- Had shearing school 4-8 April. 14 students shore 525 green tag ewes. We had 3 female and 5 male students who already work in the industry. One student is aboriginal and was sent by a contractor, 1 student works for a local corporate farm, 1 student is a part-time farmer from Unicup and 2 students were novice learners. 1 student's dad is a shearer and they used to live in Boyup Brook.
- Working on having a shearing school at the end of July.
- AWI proposal for funding for next financial year
- Approached Co-Op regarding donating the unused lady's day sponsorship money they would prefer the money to be returned.

General

- Shire taking gravel at Rylington
- Shire busy painting lecture room done, dorms inside done, busy with ablution blocks. Floor coverings for the dorms will go in on 20 May
- Air conditioner for the lecture room will be installed on 27 May
- Plumber busy replacing all old gutters and putting in downpipes.
- Waiting on water tank they are waiting for the tank's roof to arrive pad ready.
- House roof will only be done after the winter as they are a month behind. We have received all the materials.
- Chemical shed should be installed by the end of the month.
- Fire radio was installed in Toyota ute.

What lies ahead

- Feeding sheep
- Capsules before lambing
- Ewes start lambing XB on 1st June and merinos 2 weeks later
- Seeding
- Getting ready for ECU day on 1 June
- Install sheep handler
- Fencing
- · Collecting old wire
- · Organise shearing school

- Budget
- Planning on taking leave from 7-22 July

Mobble screenshots - (refer to attachment)

Financials to end of April 2022 (refer to attachment)

Cr Adrian price left the Chambers at 6.17pm

2. Previous Minutes

Committee Recommendation

MOVED: Cr Helen O'Connell

That the minutes of the Rylington Park Committee held on 7 April 2022 be confirmed as an accurate record.

SECONDED: Cr Charles Caldwell

CARRIED Res 22/5/47

3. General Business

- It was discussed that a separate shire account be set up for Rylington Park.
- An agreement to be put in place between the Shire of Boyup Brook and any other organisation that is utilizing the Rylington Park Farm.

Next meeting to be confirmed.

There being no further business the Shire President, Cr Walker thanked all for attending and declared the meeting closed at 6.56pm.
