CURRENT ITEMS

- **UWA Sub Clover trials – Chairperson and Farm Manager to provide update**

Prof Phillip Nicols from UWA has set out an area of 80x70m required for the sub clover trials over a three-year period. DCEO has received a draft agreement from Prof Nicols for review.

It was queried as to whether there was a conflict with the MoU between Rylington Park and ECU regarding this UWA Trial, with Professor Brown from ECU advising that as the trial is a one-off, it does not override the collaboration agreement in place. Professor Brown did indicate that the Universities should be working together.

DCEO was requested to have “Letter of Agreement” in place for all commercial and collaboration agreements and that it encapsulates that results of trials be communicated to the Committee and that researchers should showcase at Rylington Park Field Days.

DCEO to provide update.

- **Roles and Responsibilities of Committee Members**

Cr O’Connell queried whether community and external members of the Committee should be advised formally of their “Roles and Responsibilities” as a Committee Member, much like that which applies to Councillors under its Code of Conduct.

The DCEO indicated that community and external members have the same role as Councillors, being official appointees to an Advisory Committee of Council. These Roles and Responsibilities, via Council’s Code of Conduct, would be circulated to these Members in order that they are aware of their responsibilities and an induction would be conducted if considered necessary.

DCEO to provide update.

OUTSTANDING ITEMS

- **Potential research projects proposed by Andy McElroy (were sent to ECU in 2022, however, there hasn’t been any interest from researchers at present)**

Prof Kerry Brown was requested to revive the research list emailed to Rylington Park in November 2021.

- **Potential research project proposed by Greening Australia (rehabilitating creek line and establishing a native plant seed bank).**

ECU is in collaboration with Greening Australia on establishing native seed bank and rehabilitating the creek lines and Prof Kerry Brown will contact David Field and write a report to the next Rylington Park Committee meeting on the research project.
