

Supply goods or  
services to big  
business?  
This affects you!

## Climate Reporting Readiness - South West Business Workshop Series

**New legislation** came in to affect in January. Reporting regulations require large business to disclose climate-related information, and if you supply products or provide services to major businesses it's important to understand your requirements.

**How it works:** Carbon reporting by larger firms is soon being extended to what is called "Scope 3". This means that companies will be looking at their contractors and suppliers' carbon emissions and climate actions – and that means you.

**Learn** what you need to do to maintain your contracts with large firms - what information you have to collect and how to put plans into action.

**Get templates,** resources and advice from industry expert, **Dr Vanessa Rauland** from **Industry Capability Network (ICN)** who will deliver an informal and hands-on session to help your business prepare.

Tickets just **\$25pp** which includes morning tea, tea/coffee and all materials. Register now to save your spot - places are limited.

**Thurs 26th June**

Manjimup Family Centre  
9am to 12pm
