

\$1,500,000 CSRFF funding approved for upgrades

The Shire is excited to announce that our application for funding through the Community Sporting and Recreation Facilities Fund (CSRFF) has been successful! The Shire has been successful in obtaining a grant of \$1,500,000.00 to assist with the addition of new changerooms and upgrades to the sporting clubhouse/evacuation centre. The Hon David Templeman MLA said 'The Shire of Boyup Brook is to be commended for its commitment to the provision of quality community leisure facilities'.

The upgraded facilities will see the addition of inclusive changerooms along with an extension and new interior fit out of the existing building. The Shire is currently working on the final stages of the plans for the upgraded facility.

This has been a key project for the community and the Shire is delighted to see it coming closer to fruition.

The Nationals WA have pledged \$4.85 million to fund the design and construction of a new multipurpose recreation and evacuation centre for the Boyup Brook community!

Bevan Eatts - Nationals for Warren Blackwood said, 'Boyup Brook is a strong, vibrant regional community, but it lacks modern recreational infrastructure.'

With 15 sporting clubs across the Shire of Boyup Brook, sport is at the heart of this community, but it's time for a modern, dedicated facility to match that passion.'

Food Allergen Declarations

New food allergen declaration labelling requirements came into effect on 25 February 2025 for all food businesses. Local government enforcement agencies and authorised officers are responsible for ensuring compliance and enforcement of food businesses with food allergen management and declaration requirements.

Robust allergen management in food businesses is required to ensure susceptible individuals are not placed at risk of an allergic reaction when consuming food. Substances in a food that cause an allergic reaction are called “allergens”. For sensitised individuals, food allergens can trigger allergic reactions that range from mild to severe. Some individuals may be allergic to more than one food allergen. Eating even the smallest amount of the allergen, for some sensitised individuals, can cause a life threatening allergic reaction called anaphylaxis. Anaphylaxis is usually rapid in onset, and can sometimes be fatal.

All food businesses are responsible for compliance with the legislative requirements specified for declaring allergens in their food; including where a customer has requested a food to not contain a specific food allergen ingredient. A sensitised individual needs to identify and manage their exposure to food allergens.
